### **Toshiba Carrier u-Series Heat Pump and Heat Recovery Unit Availability Update – April 2024**

We are in the process of phasing out e-Series heat pumps and heat recovery units and phasing in u-Series systems. Since modules for both e-Series and u-Series cannot be used together for larger systems utilizing multi-module pairings, provision of u-Series modules must be used in entirety as a replacement to the e-Series system if one of the modules are not available. This bulletin will outline the current modules that are expected to run out of inventory within the next three (3) months.

#### **Heat Pumps**

Currently, the 6-ton heat pumps modules are phased out. There are no multi-module e-Series pairings that require the use of the 6-ton modules, so a u-Series model can be used in its place. Please verify any difference in electrical ratings between the two (2) series of modules. The u-Series heat pump bulletin, as well as our existing engineering manuals on HVACpartners, may be used for reference. We anticipate the following e-Series heat pump modules will phase out within the next three (3) months.

| Tonnage | 280/230V Model                     | 460V Model                         |
|---------|------------------------------------|------------------------------------|
| 6       | MMY-MAP0726HT9P-UL                 | MMY-MAP0726HT6P-UL                 |
| 8       | MMY-MAP0966HT9P-UL                 | MMY-MAP0966HT6P-UL                 |
| 10      | <a href="#">MMY-MAP1206HT9P-UL</a> | <a href="#">MMY-MAP1206HT6P-UL</a> |
| 14      | MMY-MAP1686HT9P-UL                 | MMY-MAP1686HT6P-UL                 |

## Product Bulletin

Because of the limited availability of the mentioned heat pump modules, please evaluate the current level of inventory of each of the modules above before configuring applications with the multi-module systems listed below.

| Tonnage   | 280/230V Model                     | 460V Model                         |

Although several models are listed, please check to see existing stock of these models. The u-Series heat pumps and heat recovery units will start to phase in as the e-Series models in inventory are depleted.

For assistance with the whether to use u-Series systems vs. e-Series systems in the design, please reach out to your regional sales manager, customer service contact, or the VRF inbox at [VRFapplications@carrier.com](mailto:VRFapplications@carrier.com) for more information.
