### DESCRIPTION

547K 08-14 size units are single-packaged heat pumps that are pre-wired and pre-charged with Puron® (R-410A) HFC refrigerant. Electric heat is available as field-installed accessory and units are fully factory tested. These units meet the upcoming DOE-2023 (Department of Energy) and ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) 90.1 IEER minimum efficiency requirements. Models use Bryant's leading Axion™ Fan Technology with built in speed control and no fan belts or pulleys. All models have two-stage cooling and single circuit full active evaporator coil design to provide maximum efficiency and comfort control.
