P298-Endcap*

Thank you for purchasing the P298-ENDCAP Wiring Accessories display and for supporting Totaline.

The first step in properly setting up this merchandiser is to pick a high traffic location within your store. This display is self-serve so we suggest that it be set up close to the main counter so that contractors can peruse the display as you are picking items from the warehouse.

Enclosed is a series of documents that need to be used in order to properly receive the parts into your system as well as procedures for effectively merchandising this display.

1. Parts Receiving Document

Identifies all Totaline part numbers and corresponding quantities that relate to the complete display. These parts and quantities must be received into your system as inventory received.

In "Demand Solutions" set up safety stock levels for each item on the display. Use the quantities from the attached forms to pick your re-order points. Demand Solutions will then "flag" items that need to be re-ordered once the safety stock level drops below the safety stock quantity. By setting minimums and maximums for these parts, you will be able to keep the display well stocked and eliminate lost orders due to out-of-stock positions.

2. Merchandising Plan-o-grams

A. Plan-o-gram – Peg Positions
Identifies all peg positions for all parts making initial set-up quick and easy. Once pegs are in place, load with the re-order tags.

B. Plan-o-gram – Product Placement
Use this plan-o-gram and the enclosed picture as your guidelines to place the product on the correct peg.

CRIMP IT!
SHRINK IT!
TIE IT!
AND NOW
TWIST IT!

3. Re-order Tags

We have enclosed a complete set of re-order tags to be used on all peg hooks. The re-order tag identifies the part number, includes a full description as well as an illustration of the part.

4. TOTALINE Catalog

Literature # 570 905 REV F 02/2023
We have enclosed our latest TOTALINE wiring accessories catalog. These are available from RCD and are great reference tools for the contractors to have onsite with them. We have a very strong lineup of parts and accessories. Not all parts made it into the display but are available through RCD. Please order additional catalogs through RCD.

If you require assistance with re-ordering, please contact your Regional Service Manager.

TOTALINE

Please refer to our TOTALINE Wiring Accessories Distributors Catalog (literature #570 905 REV F 02/2023) for a complete listing of all the packaged wiring accessories available in the program.

TOTALINE'S catalog will provide you with a comprehensive description of all the products available through TOTALINE.

TOTALINE'S product line includes:

- Electrical interconnect devices accommodating wire sizes from 22 AWG to 6 AWG.
- High temperature terminals and special adapters for extreme or sensitive environments.
- Nylon cable ties for tying or bundling wires and cables or securing devices of any kind.
- Specialty items for routing, identifying and insulating cables and protecting wires from abrasion.
- Heat shrinkable tubing that provides insulation, sealing, strain relief and mechanical protection.
- New generation of heat shrinkable terminals with sealing technology to protect against environmental problems.
- Broad range of application tools and accessories for quick and reliable installations.
