Title: Line Set Conversion for 38MPRBQ09XA3 to 40MPHAQ09XA3

Product Category: Ductless

Products Affected:

DLS High Tier 40MPHAQ09XA3

Situation:

The newest High Tier Outdoor unit model, 38MPRBQ09XA3, Here has a different line set size compared to the 40MPHAQ09XA3 which is in the process of being phased out. Specifically, the 38MPRBQ09XA3 features a 1/2" suction line, while the 40MPHAQ09XA3 uses a 3/8" line. This difference in line size necessitates a conversion joint when installing these two models together.

Technical Information:

The required conversion joint can be ordered through RC, with the Part # **15500303002544**.

References:

RC Part Number – 15500303002544

Photo is typical. Some differences may be noted.

NOTE: This conversion is only needed when pairing the new 38MPRBQ09XA3 with the phased-out 40MPHAQ09XA3 High Wall unit. When pairing the 40MPRBQ09XA3 with the earlier release 38MPRAQ09XA3, NO additional accessories are required since the necessary adapter is included with the indoor unit factory package.

Only trained and qualified personnel should design, install, repair and service HVAC systems and equipment. All national standards and safety codes must be followed when designing, installing, repairing and servicing HVAC systems and equipment. It is the responsibility of the Dealer to ensure local codes, standards, and ordinances are met.
