

ClimaVision

Starter Kit

Part # 7C-Starter-Kit-V1

A great tool for getting started with the ClimaVision product line.

The ClimaVision Starter Kit delivers the essential edge-to-cloud hardware required to bench-test configurations, familiarize your team with the system architecture, and accelerate field deployments, all at an exceptional value. This Starter Kit is a complete micro-ecosystem that allows technicians to interact with the system exactly as they would on a live commercial site. Whether you are simulating a system with single-zone equipment and a thermostat or want to simulate installing a zoning system, this kit has everything you need.

ClimaVision Starter Kit v1 includes:

- VEVOR Weatherproof Protective Rolling Case (Exterior Dimensions: 21-3/4" x 13-1/2" x 9-1/2")
- CCU XR (7C-CC-K10K-IA)
- Smart Node v2 (7C-SN-C3X-X)
- MyStat v2 IAQ (7C-TS-C4K-C2)
- Multi Sensor v2 (7C-SE-C77X-X)
- HyperStat Split (7C-HS-K9X-X) includes:
 - Connect Module (7C-SN-C4X-X)
 - HyperLite (7C-HS-C13W-X)
- 24 Volt Plug-in Transformer, 40 VA
- 1/4" Black Acrylic mounting plate
