

i-Vu® Building Automation System Trend Export Add-on v2.6

Part Number: ADD-TRNDEXP

Carrier® i-Vu® add-ons extend the capability of the i-Vu building automation system. The Trend Export add-on allows you to specify, manage, and export trend data from the i-Vu building automation system so that it can be analyzed externally using third party analytics packages or tools. Trend data can be exported on-demand or at scheduled intervals. This provides building operators with a simple and powerful way to view their important building data inside their visualization tool of choice.

Application Features

- Common .CSV or database export format for the trend data ensures ease of use outside of the i-Vu building automation system
- Daily, hourly, and on-demand export options
- Manually export all available trends
- Trend data can be grouped and scheduled for added flexibility
- Reoccurring trend exports only include new historical data received since the last export
- Trend source geographic information included with export

What's New in v2.6

- Export failures trigger a System Error alarm
- Ability to access the add-on with the "Maintain Graphs and Reports" privilege
- Ability to schedule and suspend exports at the group level
- Ability to bulk delete export history
- Location dependent privileges synced with BAS while creating or editing a group
- User interface, logging, and error message improvements

Analytics Packages and Spreadsheets

Requires: i-Vu Pro User Interface
