

# CARRIER CONTROLS EXPERT CONTRACTORS

Tested, Certified and Factory Authorized  
Professionals to Deliver the i-Vu®  
Building Automation System

## WHERE EFFICIENCY MEETS EXPERTISE

Protect your investment  
by choosing a factory-  
authorized Carrier  
Controls Expert  
Certified Contractor

Carrier trains, tests, and certifies HVAC installers to be experts in building controls. With thorough training and ongoing testing, our certified installers are always available to help you get the most from your i-Vu building automation system.

These contractors are true partners dedicated to ensuring that your i-Vu system is correctly maintained. And, our extensive network ensures that you have multiple certified Experts in your area to choose from.

### WHY CHOOSE A CONTROLS EXPERT CONTRACTOR?

- Extensive knowledge of the i-Vu building automation system
- More than just a vendor—a partner dedicated to optimizing the performance of your building
- Peace-of-mind: ensure your equipment and controls are expertly maintained
- Consistently maximize the value of your building's systems

i-Vu® Building Automation System

## KEEPING YOU CONNECTED 24/7/365

The components that power today's smart buildings have grown increasingly complex. At Carrier, we want to make it easy for you to manage all your equipment so you can drive greater efficiencies across your entire organization.

With the i-Vu® BAS, you can bring your systems together to see a bigger picture, make better decisions and improve performance — all with an easy-to-use interface that's accessible from anywhere.

Discover a smarter platform for managing your buildings. Experience total comfort and control with the i-Vu building automation system.

## DYNAMIC I-VU CONTROLS

Experience total control with the i-Vu BAS, built on open standards like BACnet® and BTL-certified for seamless integration. Our controls are:

- Open & flexible: Easily integrate with Carrier or non-Carrier HVAC equipment and a wide range of building systems.
- Programmable: i-Vu general-purpose controllers adapt to your facility's needs with an extensive application library.
- Scalable Design: Build systems of any size, from small facilities to an entire building portfolio.
- Factory-Tested: Ensures reliable and efficient operation from day one.

Bring all your operations into focus for a healthier and more efficient building with the i-Vu building automation system. And, rest assured of a seamless installation and service experience with our network of certified Controls Experts.

## WHERE EFFICIENCY MEETS EXPERTISE

Carrier trains, tests and certifies HVAC installers to be experts in building controls. With thorough training and ongoing testing, our certified installers are always available to help you get the most from your i-Vu system. So wherever you are, know that you can count on us for the industry-leading excellence that's synonymous with the name Carrier.
