i-Vu® Building Automation System
EcoReports™ StoryBoard Edition
Part Number: CIV-ER-STORY

The EcoReports™ storyboard edition showcases your building's energy conservation and sustainability measures to building occupants, making its behind-the-scenes workings engaging and interactive.
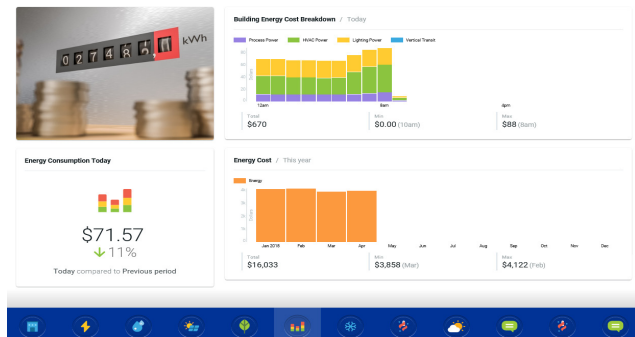

Designed to showcase building health and performance, the EcoReports storyboard edition retrieves information from the i-Vu® Pro building automation system and other sub-metered and renewable resources, making it accessible to those who impact building performance the most - building occupants. By increasing awareness of energy efficiency programs and sustainability initiatives in your facility, people and teams across your organization are encouraged to collaborate around shared sustainability goals.

Features & Benefits

- Deliver interactive and dynamic displays of building health metrics that can be shared with occupants

- Educate building occupants about healthy building and sustainability goals and progress to drive occupant awareness and action

- Display on a public touchscreen, company intranet, or mobile device

- Engage facility occupants in energy and water use reduction competitions by tracking real-time usage and cumulative year-over-year savings on interactive dashboards

- Capture and share the success of your programs and initiatives with colleagues, occupants, and the public

- Tell the story of your building with interactive dashboards

- Distribute information via real-time alerts, emails, and public views

- Drive occupant activity with lobby signage and energy reduction competitions

Educate facility occupants about
healthy building initiatives and progress

Engage facility occupants in energy
reduction efforts with usage information

Energy Management, Reporting, and Visualization

EcoReports™ Storyboard Edition
The EcoReports storyboard edition showcases your building's health, energy conservation and sustainability measures to building occupants, making its behind-the-scenes workings engaging and interactive. Educate and engage building occupants and visitors by telling the story of your building.

EcoReports™ Dashboards Edition
The EcoReports dashboards edition builds upon the EcoReports storyboard edition to deliver a 360-degree view of building performance to help you meet your energy conservation and savings objectives. Create graphs, charts, reports and dashboards to visualize building data easily, and then share them with the stakeholders that matter most.

EcoReports™ Custom Edition
The EcoReports custom edition builds upon the EcoReports storyboard and dashboards editions by adding several key analysis and visualization capabilities for advanced energy management across your building portfolio. Reconcile utility bills, measure and verify capital projects, create custom tenant dashboards, and much more.

Enterprise Level Security

i-Vu® Secure Data Connector
All of our EcoReports packages leverage data from the i-Vu Pro building automation system. The i-Vu secure data connector establishes an authenticated (oAuth) push-based connection which provides outbound reporting of building and meter data from the i-Vu system to your EcoReports cloud environment. The connector uses a secure and encrypted authenticated session (over SSL which pushes information up to the cloud and does not require any inbound connectivity.

Building Automation & Control

i-Vu® Pro Building Automation System
The i-Vu Pro building automation system transforms equipment and controls into a cohesive system that allows facilities staff to monitor and control the entire building for occupant comfort and energy efficiency.
