What's new in v8.5

What's new in the i-Vu® Pro v8.5 application

Feature	Improvement
Remote System Engineering	Full featured system configuration in the i-Vu Set Up Tree
Staged firmware downloads	• Keep the controller online while transferring a driver from the server to the controller, then only take the controller offline when installing those files • Reduce downtime of controllers by at least 75%
Network Tree Organization for IP Networks	Easier network organization for large IP controller networks
Report options	• System-wide report formatting options available to all i-Vu report users • New Operator Information Report • Numerous improvements to Custom Reports • Quarantine Data reports for Life Science Systems • Custom logo feature moved to **System Options** > **System Settings** > **Reports**
New "programdata" directory structure	• Enables quarterly releases • Increases security • Simplifies installation • Place your system folder anywhere you like
Additional Features	• License expiration shown on About page • Personal Information fields removed from Operator page
