## **Carrier Adds New Lower GWP Refrigerant Option to AquaEdge 19XR**

**CHARLOTTE, N.C., Oct. 17, 2024 —** Carrier has announced the availability of a lower global warming potential (GWP) refrigerant in the AquaEdge® 19XR high-efficiency semi-hermetic, water-cooled centrifugal chiller. [Carrier](#) is a part of Carrier Global Corporation (NYSE: CARR), global leader in intelligent climate and energy solutions.

The 19XR is now available with R-515B, which was chosen for its environmentally balanced impact, high energy efficiency, wide availability and ease of use. The 19XR is also available with R-513A.

The addition of 515B continues Carrier's commitment to providing customers with solutions that use the right refrigerant for each application, while helping to reduce carbon footprint.

The 19XR features two-stage compression technology and is designed for flexibility to meet the needs of large buildings such as skyscrapers, airports and universities. It is available from 600 to 3,400 tons. For more information on Carrier's AquaEdge 19XR, visit [carrier.com/19XR](http://carrier.com/19XR).

Carrier is shifting to lower GWP refrigerants across its chiller offerings and is committed to offering the right refrigerant for each application. The use of lower GWP

refrigerants supports Carrier's 2030 [Goals](#), including helping customers avoid more than 1 gigaton of greenhouse gas emissions by 2030.

### **About Carrier**

Founded by the inventor of modern air conditioning, Carrier is a world leader in high-technology heating, air-conditioning, digital platforms and building automation systems. Carrier experts provide sustainable solutions, integrating energy-efficient products, controls and service for commercial applications, including data centers, healthcare facilities, schools, retail centers, office spaces and more. Carrier is a part of Carrier Global Corporation, global leader in intelligent climate and energy solutions that matter for people and our planet for generations to come.
