Vroom for Engineers & Contractors

ATTENTION VROOM USERS

We are pleased to announce that an updated version of Bryant VRoom for Engineers and Contractors is now available for direct download from HVAC Partners.

Each brand of VRoom has a respective installer file that should be downloaded. Please see links below to installer file:

Bryant: <https://www.sharedocs.com/hvac/docs/1004/public/08/BRYANT-VROOM-20360/1/BRYANT-VROOM-20360.EXE>

We kindly ask that Distribution communicate the following VRoom installation steps to Engineers and Contractors who are installing **multiple brands** of the software:

- To install, download installer file and double-click on it to launch installation. Follow the instructions which appear on your screen during installation. DO NOT open VRoom until installation is complete.
- Once installation is complete, double-click on VRoom desktop icon to open the software which should then prompt you to auto-update to the latest version.

Please contact the VRoom Support Team at VRoomhelp@carrier.com or your Regional Sales Manager with any questions.
