

COMMERCIAL HVAC REBATES FOR UNITARY AND APPLIED SYSTEMS

A Sales Tool That Helps Close More Business

HELP CUSTOMERS REDUCE UPFRONT COSTS WHILE
INCREASING THE VALUE OF EVERY PROPOSAL.

High-efficiency commercial HVAC systems may qualify for utility, manufacturer, and tax incentives that can significantly reduce project costs. This tool makes it easy to identify available incentives for qualifying unitary and applied equipment, giving your customers greater confidence to move forward with their investment.

Identify available rebates early in the sales process to build a stronger financial case, improve return on investment, and help customers justify higher-efficiency solutions. Whether replacing existing equipment or specifying systems for a new project, this tool helps uncover savings that can make the difference between delaying a project and moving it forward.

Why Use the Commercial HVAC Rebates Tool?

This tool searches for available incentives based on project location and equipment, helping identify savings that can improve project economics and lower total cost of ownership.

- Identify available utility, manufacturer, and tax incentives
- Help customers reduce upfront equipment costs
- Demonstrate long-term energy savings and ownership value
- Strengthen proposals with verified rebate opportunities
- Support faster purchasing decisions

Discover available rebates and build stronger, more competitive proposals.

Step 1: Visit the [Commercial HVAC Rebates page](#) to search for available incentives

Step 2: Search for specific model numbers or by ZIP Code
