

Pennsylvania COSTARS Direct Purchasing Program

What is Direct Purchasing & Who Can Use It?

The COSTARS program leverages procurement contracts established by the PA Department of General Services (DGS) and utilizes competitive pricing strategies to achieve the best value for member organizations. Through the COSTARS program, local government members are provided with the option to participate in cooperative purchasing opportunities for products and services such as:

IT hardware and software, office supplies, voting systems, energy conservation management supplies, street lighting, signage, toiletries, uniforms, emergency responder vehicles, water and wastewater treatment products, pest control services and more

All of the following are considered to be "local public procurement units (LPPUs)" eligible to participate in the COSTARS program:

- Any political subdivision, municipality, school district or commission
- Any public authority
- Any nonprofit fire company, rescue company or ambulance company
- Any tax-exempt, nonprofit educational institution or organization
- Any tax-exempt, nonprofit public health institution or organization
- Any other entity that spends public funds for the procurement of supplies, services and construction (such as a council of governments or an organization that receives public grant funds)

How Do I Buy?

- Contact your local Carrier representative for equipment, service or parts needs:
 - **HC Nye Company** | Eric Spring | eric.spring@hcnyc.com
 - **Standard Air & Lite Corp** | Rob Settle | rsettle@stdair.com
 - **Carrier Direct Sales, Philadelphia** | Donovan Denlinger | donovan.denlinger@carrier.com | 215-353-0142
- Communicate your intention to use the COSTARS purchasing contract.
- Your local representative will work with Carrier to fulfill your requirements in accordance with the terms of the contract.

Carrier OptiClean™

Dual Mode Negative Air Machine & Air Scrubber

- ▶ Rapid deployment—just roll it in and plug the cord into any outlet
- ▶ High-efficiency HEPA air filtration—99.97% efficient long-life (~40,000 hour) HEPA filter removes particles as small as 0.3 microns
- ▶ Portable, flexible, and easy to reconfigure—ideal when requirements can change quickly and unpredictably; it moves easily from room to room,

and can be operated vertically or horizontally

- ▶ Supplements your existing system—quickly reduces airborne pathogens without replacing or modifying your installed HVAC equipment
- ▶ Easy to specify—for example, to get 6 air changes per hour in a room with a 10' ceiling, you'll need 1 CFM of scrubbing for every ft² of floor space

▶ Exceeds ASHRAE's school reopening recommendation* that portable electric HEPA machines be introduced into each classroom and provide a minimum of two air changes per hour

- ▶ Choose from two sizes—500 and 1500 CFM
