## **Carrier's AquaSnap® 30MP Chiller Now Meets Higher Efficiency Requirements**

*Water-cooled and condenserless modular chiller package enhancements increase 30MP applicability, especially in big cities*

**CHARLOTTE, N.C., Nov. 27, 2017** — Designed for faster, less expensive installation in high-rise applications, Carrier is pleased to introduce the latest version of the slimmed-down AquaSnap® 30MP chiller that now meets all ASHRAE 90.1 efficiency requirements. Additionally, certain model sizes accommodate the 15HPper circuit regulation common in many large cities, eliminating the need for costly 24/7 support. Trim enough to fit through a standard size door or elevator and boasting a modular design that can be easily connected to provide greater capacity, the 30MP is Carrier's answer to the challenge of providing climate control in tough-to-reach spaces. Carrier, a world leader in high-technology heating, air-conditioning (HVAC) and refrigeration solutions, is a part of UTC Climate, Controls & Security, a unit of United Technologies Corp. (NYSE: UTX).

The 30MP can be piped together in-line, which can also help significantly reduce the first cost of any installation in new and retrofit applications while providing up to 560 tons of cooling.

“Our product team works hard to support our customers and their system design needs with ongoing product development like that of this AquaSnap 30MP. This package has always been an ideal solution for retrofit applications, given its small size and portability. Now with its ability to meet ASHRAE 90.1 efficiency requirements and with certain model sizes 15HP per circuit regulations, it can be a viable solution for tall buildings in even the largest U.S. cities,” said Chris Opie, director, North America Commercial Marketing. “We are excited to provide our customers with opportunities to solve complex chilled-water system needs affordably with this modular package.”

Additional 30MP features and options that can uniquely enhance HVAC system performance include a digital compressor, separate multi-unit controller, single input power to electrical distribution Panel and a remote air-cooled option. Additional information can be found at [Carrier.com/30MP](http://Carrier.com/30MP) or by contacting [your local Carrier expert](#).

### **About Carrier**

Founded by the inventor of modern air conditioning, Carrier is a world leader in high-technology heating, air-conditioning and refrigeration solutions. Carrier experts provide sustainable solutions, integrating energy-efficient products, building controls and energy services for residential, commercial, retail, transport and food service customers. Carrier is a part of UTC Climate, Controls & Security, a unit of United Technologies Corp., a leading provider to the aerospace and building systems industries worldwide.
