

# Enable innovative capabilities for your 30HXC (series 7) chiller with SmartVu™ Controls through your PIC6 control panel

As 30HXC chillers continue to age, the need for enhanced operating efficiencies, monitoring capabilities and improved connectivity becomes crucial to your HVAC performance. Thanks to Carrier SmartVu™ Controls, the innovative technology that enhances the 30HXC chiller is merely a retrofit away.

## Modernization without an equipment overhaul

- Enhances operating efficiency
- Monitors capabilities and overall HVAC performance
- Easily upgrades your 30HXC chiller

## The lifespan solution for your aging chiller

- More user-friendly graphical interface
- Improved Wi-Fi capabilities and added efficiency
- Remote, cloud-based connectivity and monitoring
- Maximized chiller life

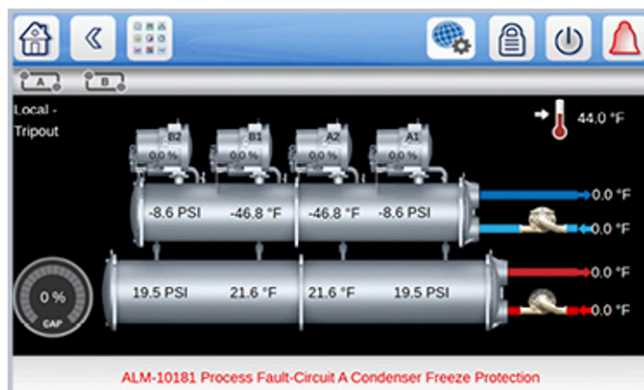

## SmartVu™ Controls delivers

- Common control platform with native connectivity
- Increased RAM size for controls supporting BACnet, MSTP and Modbus points for predictive analysis
- Onboard service log for tracking service
- Prognostics to stay ahead of repairs with 250 data points for monitoring status and trends records

## Advanced features and increased security

- Critical data, records and alarm history plus directly connected to BluEdge™ Service Platform with increased security measures
- Graphical interfaces with animations
- Faster start-up time to maximize your productivity

SETPOINT - Setpoint		
Cooling Setpoint 1	44.0	°F
Cooling Setpoint 2	44.0	°F
Cooling Ice Setpoint	44.0	°F
Cooling Ramp Loading	1.0	°F
Motor Temp Setpoint	167.0	°F

## Key benefits

- **Enhanced graphic display** — graphical touch screen via latest technology, which greatly enhances human engagement and interaction with the chiller, allowing for more efficient usage.
- **Updated technological control panel** — enables customer to take advantage of digital connectivity benefits such as remote monitoring, proactive diagnostics and other connectivity aspects Carrier™ offers via BluEdge™ customized service agreements.
- **Adds internet capability** — allows the customer to be part of the active service monitoring program.
- **Avoids obsolescence** — as the ComfortLink platform ages and hardware availability becomes a concern, this kit will provide the customer with an appropriate alternative to extend the life of their 30HXC chiller when this scenario takes place.

## Superior Carrier service you can rely on.

Regardless of your equipment's age, protocols or manufacturer, we can pinpoint service issues and provide ongoing recommendations. We'll also anticipate any potential problems, saving you time and money.
