## **Carrier Introduces AquaSnap® 30RAP Chiller with Greenspeed® Intelligence**

*New model features greater efficiency and quieter operation*

**CHARLOTTE, N.C. March 16, 2016** — [Carrier](#) is pleased to introduce the AquaSnap 30RAP chiller featuring the Greenspeed Intelligence option, which includes variable speed technology that further increases energy-efficiency and delivers quieter operation. Carrier, the world's leader in high-technology heating, air-conditioning and refrigeration solutions, is a part of UTC Climate, Controls & Security, a unit of United Technologies Corp. (NYSE: UTX).

Adding Greenspeed Intelligence to a 30RAP chiller will boost integrated part load value, making it the most efficient chiller in its class, serving applications from 10 to 60 tons. Available now, efficiency of the 30RAP chiller with Greenspeed Intelligence averages nearly 10 percent more than its standard configuration, which already delivers leading efficiency.

“Making the Greenspeed Intelligence option available on this lower tonnage air-cooled chiller line exemplifies our commitment to providing our customers with the most efficient heating and cooling equipment in the industry,” said Chris Opie, director,

marketing, Carrier Commercial Systems. "Having the option to increase efficiency ratings while reducing sound levels makes the AquaSnap 30RAP with Greenspeed Intelligence -- and the buildings they belong to -- even more valuable."

The AquaSnap 30RAP chiller with Greenspeed Intelligence is ideally suited for schools, hotels, hospitals and any other applications where quieter operation is a requirement.

This new model features variable frequency drives and advanced ComfortLink™ Controls to obtain optimal chiller performance.

Customers interested in learning more about this new line of AquaSnap 30RAP chillers can visit [www.carrier.com/commercial](http://www.carrier.com/commercial).

#### **About Carrier**

Founded by the inventor of modern air conditioning, Carrier is the world's leader in high-technology heating, air-conditioning and refrigeration solutions. Carrier experts provide sustainable solutions, integrating energy-efficient products, building controls and energy services for residential, commercial, retail, transport and food service customers. Carrier is a part of UTC Climate, Controls & Security, a unit of United Technologies Corp., a leading provider to the aerospace and building systems industries worldwide.
