

Carrier Start-Up Services

Certified Technicians Delivering Peace of Mind

Achieve Maximum Performance, Efficiency and Reliability for Your Carrier Equipment... Right From the Start

The service experts at Carrier know that your heating, ventilating and air conditioning (HVAC) equipment is a critical asset to your building, and well worth protecting. We also know the best way to deliver and maintain that protection.

A lifetime of reliable efficiency and service begins with proper equipment start-up. Because of our specialized expertise, Carrier Commercial Service is the only organization authorized to start up large Carrier water- and air-cooled equipment. Carrier Start-Up Services ensure that your HVAC system begins its service life in the best position to perform as designed, delivering years of reliable, energy efficient space conditioning or process cooling.

Carrier Start-Up Services provide a seamless continuum of correct procedures and trusted expertise from installation forward, protecting your facility and its valuable HVAC assets.

Carrier Equipment Benefiting from Start-Up:

- 19 Series centrifugal chillers
- 23 Series screw chillers
- 16 Series absorption units
- 48/50 Series rooftop units
- 30 Series air- and water-cooled chillers
- Carrier controls

Why Use Start-Up Services?

- Protect your HVAC investment
- Ensure equipment reliability
- Ensure equipment achieves efficiency standards as designed
- Prevent damage caused by improper start-up
- Mitigate equipment failure risk
- Avoid catastrophic expenses
- Minimize down time
- Plan budgets confidently
- Assure occupant and owner satisfaction

Carrier Start-Up Services

Proper HVAC equipment start-up which follows a rigorous, factory-defined set of procedures is essential. Correct start-up is the key to optimum performance, safety and reliability — not just during the first days or weeks of operation — but for years to come.

Carrier commercial equipment Start-Up Services are performed in accordance with OEM machine start-up instructions and include machine inspection, initial operation and configuration of units including unit accessories and options.

Carrier Commercial Service provides OEM factory-trained and certified technicians — the most knowledgeable Carrier experts in the industry — to start up your Carrier HVAC equipment.

Carrier Certified Technicians

Carrier technicians are certified as Carrier Specialists or Masters—each trained extensively on products and customer service, then thoroughly tested to our exacting standards. The Carrier Tech360 Certification Program is one of the most progressive learning programs in the industry.

Because Carrier Start-Up Services are performed by these OEM factory-trained experts, you have the security of knowing that each task is done right. Our training is developed and updated using the most comprehensive, up-to-the-minute engineering data.

It leverages direct access to the service engineers who develop Carrier start-up, operation and maintenance procedures.

Each Carrier technician also has access to a constantly updated database of service information, an essential tool in supporting today's advanced products. With these advantages, your Carrier Specialist or Master Technician is the best choice for starting up your heating, ventilating and air conditioning (HVAC) system.

Focus on Environmental Health & Safety

Carrier has a corporate culture that emphasizes and values environmental health and safety (EHS), as well as a reputation for conducting all work according to carefully designed safety protocols. This high standard means our operations are secure and compliant at all times, and your equipment protected from damage.

Benefits of Start-Up Services By Carrier Certified Technicians:

- Factory support and standard work procedures for the certified experts starting up your equipment
- Peace of mind of knowing your Carrier equipment received optimum commissioning and/or seasonal start-up
- Confidence that personnel starting up valuable HVAC assets have the most up-to-date training
- Carrier emphasis on health and safety standards
- Budgetary reliability—consistent pricing with service that limits surprises
- Extended warranty eligibility for equipment started up by Carrier Commercial Service major HVAC assets
