

RENTAL SYSTEMS

**FAST AND RELIABLE HVAC SOLUTIONS FOR  
DATA CENTER ENVIRONMENTS**

# Carrier Rental Systems

Carrier Rental Systems supports data center facilities by providing equipment for both planned projects and emergency situations. Our goal is to ensure that your facility can consistently maintain healthy environments for your inhabitants. Trust us to deliver efficient HVAC and energy solutions when you need them most.

## Buildings We Serve:

Onsite

Colocation

Hyperscale

Edge

## Equipment Delay

Whether you are anticipating potential equipment delays that could result in HVAC system downtime, or waiting on delivery of your equipment for a new space, turn to Carrier Rental Systems. We offer a comprehensive range of guaranteed equipment solutions available. With Carrier, you can count on us to provide temporary HVAC solutions that will seamlessly maintain operations while you await the delivery of your new equipment.

## Planned Shutdown and Maintenance

When it comes to HVAC solutions for data centers, finding a reliable solution can help mitigate downtime during planned shutdowns and maintenance. Whether your facility is in the midst of renovations, undergoing equipment repairs, or embarking on new construction projects that might disrupt HVAC or energy operations, turn to Carrier Rental Systems for swift and efficient temporary solutions.

Our team of responsive and reliable experts is dedicated to creating a seamless plan that guarantees uninterrupted services. With us by your side, you can confidently prioritize what truly matters - the well-being of your data and staff.

## Emergency Response / Contingency Planning

Prevent unexpected disruptions in your facilities due to HVAC equipment failures or power outages. Trust Carrier Rental Systems to strategically develop a customized and cost effective emergency response plan for your unique needs. Our expert team is dedicated to ensuring that, in the event of an emergency, no valuable time is lost.

## Rent vs. Buy

As an alternative to committing to a permanent purchase, our team of experts can collaborate to deliver a comprehensive, engineered turnkey solution tailored for temporary applications, especially during the warmer months. Using this approach also allows you to use the Cooling as a Service payment model so that you can benefit from high quality cooling at better prices, and don't have to distract any budget to acquire the cooling system.

## Chillers

- Air-cooled chillers: 10 to 500 tons
- Water-cooled chillers: 150 to 1,000 tons
- Low Temperature Chillers 30 to 1,100 HP
- Explosion Proof Units
