SAFETY CONSIDERATIONS	1
INTRODUCTION	1
INSTALLATION	16

SAFETY CONSIDERATIONS

Installation and servicing of air-conditioning equipment can be hazardous due to system pressure and electrical components. Only trained and qualified service personnel should install, repair, or service air-conditioning equipment.

Untrained personnel can perform basic maintenance functions of cleaning coils and filters and replacing filters. All other operations should be performed by trained service personnel. When working on air-conditioning equipment, observe precautions in the literature, tags and labels attached to the unit, and other safety precautions that may apply.

Follow all safety codes. Wear safety glasses and work gloves. Use quenching cloth for unbrazing operations. Have fire extinguisher available for all brazing operations.

It is important to recognize safety information. This is the safety-alert symbol . When you see this symbol on the unit and in instructions or manuals, be alert to the potential for personal injury.

Understand the signal words DANGER, WARNING, CAUTION, and NOTE. These words are used with the safety-alert symbol. DANGER identifies the most serious hazards which **will** result in severe personal injury or death. WARNING signifies hazards which **could** result in personal injury or death. CAUTION is used to identify unsafe practices, which **may** result in minor personal injury or product and property damage. NOTE is used to highlight suggestions which **will** result in enhanced installation, reliability, or operation.

WARNING

Electrical shock can cause personal injury and death. Shut off all power to this equipment during installation. There may be more than one disconnect switch. Tag all disconnect locations to alert others not to restore power until work is completed.

INTRODUCTION

The accessory security grille packages help to prevent unit damage by debris or vandalism on 30RB and 30XA chillers. One accessory kit is required for 30RB unit sizes 060-300 and 30XA unit sizes 080-501. Two accessory kits are required for 30RB duplex sizes 315-390, one for each module. See Table 1 for 30RB modular unit combinations. See Table 2 for accessory kit usage. See Tables 3-25 for accessory kit contents.

Table 1 — 30RB Modular Combinations

MODULE UNITS	MODULE A	MODULE B
30RB*315	30RBA160	30RBA160
30RB*330	30RBA170	30RBA160
30RB*345	30RBA170	30RBA170
30RB*360	30RBA190	30RBA170
30RB*390	30RBA190	30RBA190

NOTE: An “**” in the model number indicates the design series.

NOTE: Condenser coil trim panels for both sides of unit must either be factory installed or purchased as a field-installed accessory before security grille installation can be completed.

Check items for shipping damage. If any damage is found, immediately file a claim with the shipping agent. If any item is missing or if any part does not assemble properly, notify your Carrier distributor.

CAUTION

To avoid damage to the refrigerant coils and electrical components, use extreme care when drilling screw holes and screwing in fasteners.

	00PPG000000701A, 801A, Grille Male/Female Fastener	—	8 each

INSTALLATION

Refer to Fig. 1-43 for the following instructions.

1. Disconnect all power to unit.
2. On the compressor side (30RB units) or the cooler side (30XA units) of the chiller only, remove each metal condenser coil trim cover. Removing the metal condenser coil trim covers is required to install the sheet metal parts that support the grilles. See Fig. 1.
3. Use Tables 3-25 to determine which unit size and figure to use as a reference. Use the M4.8 and M6 screws supplied to install the sheet metal grille supports around the perimeter of the chiller as shown in Fig. 2-24. Compressor side (30RB units) and cooler side (30XA units) supports attach to the corner post at the ends, to the bottom of the trim panel supports, and in some cases to each other. Water connection side (30RB) and compressor side (30XA) supports attach to the heavy gage coil rails directly below the condenser coils. Control panel and blank end supports attach to corner posts, coil support post, and top condenser coil caps. For 30XA units with Greenspeed® Intelligence (variable speed units), also see Fig. 25. Refer to Fig. 26-29 for views of all sides of a chiller with the metal supports attached.
4. All grilles use a male fastener and a female fastener for securing to the metal supports installed in Step 3. Snap a male fastener into each rectangular opening in all metal supports installed as well as the sides of all metal condenser coil covers. Similarly, push a female fastener into each round hole of all wire grilles. Install the fastener from the flat side of the grille plate as shown in Fig. 30.
5. All lower grilles have small tabs or offset legs for placement in a metal support or chiller base frame. Install the grilles around the perimeter of the chiller and push the fasteners together. The fasteners will lightly pop into place. See Fig. 31-34 for views of completed installations.
6. Replace the metal condenser coil covers removed in Step 2. Install upper grilles between all coil covers. See Fig. 35-43 for views of all sides of a chiller with all grilles in place.
7. When all grilles are properly installed and fastened, restore power to unit.
