Phase Out of QN & QA Ductless Split Systems

The Ductless Split Systems team is announcing the phase out of all QN (High wall) and QA (Underceiling) systems, effective upon depletion of factory inventory. Affected models are listed below.

In an effort to continuously improve our business and offer customers a broad product range, we are working to replace this line with a more complete, versatile, and relevant offering.

The new Ductless models will be available to order in mid-June.
