WEATHERMAKER® 8000TS – 58TUA, 58TMA, 58UXT, 58DXT

Gas Furnaces

WITH ComfortHeat™ TECHNOLOGY

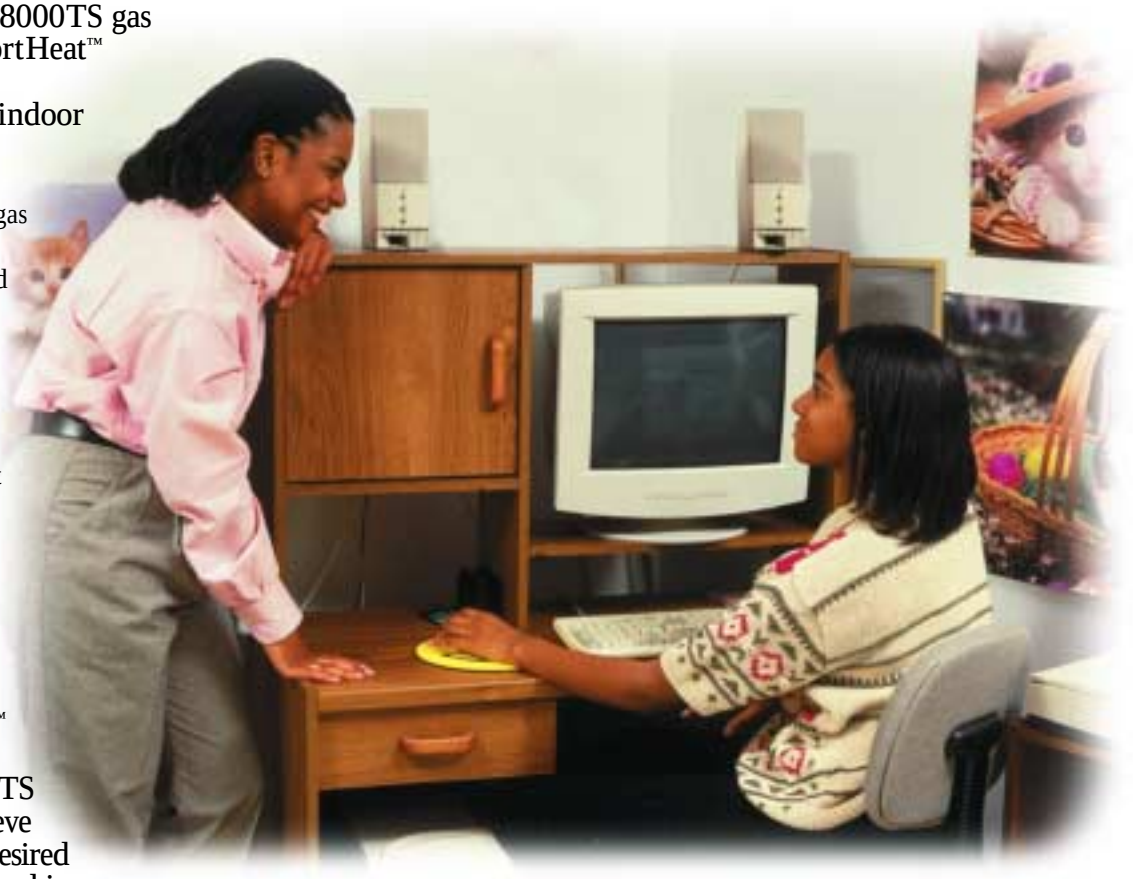

ComfortHeat™ TECHNOLOGY

CONSISTENT COMFORT WITH 80% AFUE

Custom made comfort with Carrier's WeatherMaker® 8000TS Gas Furnace with ComfortHeat™ Technology.

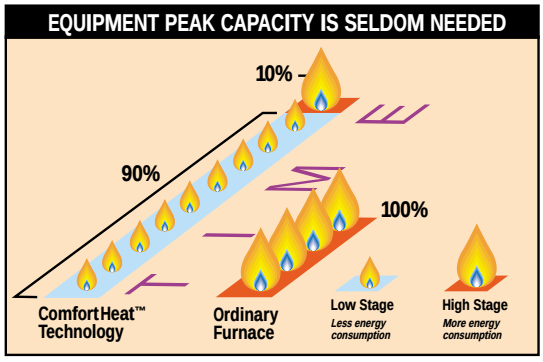

two-stage comfort

The WeatherMaker 8000TS gas furnace with ComfortHeat™ Technology delivers consistent, efficient indoor weather. ComfortHeat Technology enables the WeatherMaker 8000TS gas furnace to improve indoor air circulation and overall comfort. Unlike ordinary furnaces, the WeatherMaker 8000TS operates at a slower, more consistent level up to 90% of the time. That means the temperature swings, as well as the hot and cold drafts, typically associated with ordinary furnaces are virtually eliminated.

indoor air quality

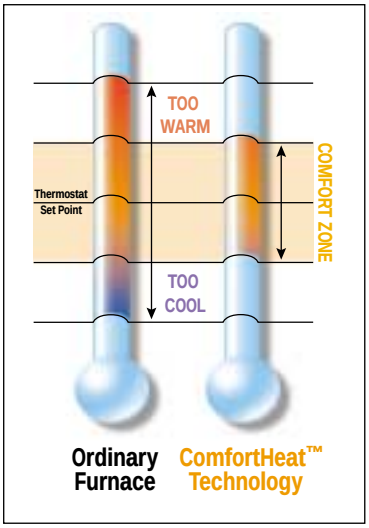

With ComfortHeat™ Technology, the WeatherMaker 8000TS gas furnace can achieve and maintain your desired indoor temperature and improve the quality of the air you breathe. Offering a lower heating stage, this furnace creates heating cycles that last up to 40% longer than ordinary models. This enhanced air circulation not only helps maintain a more consistent temperature, it also improves your indoor air quality because air passes through the furnace filter for longer periods of time. With the addition of a high-efficiency Carrier air filter, this system can provide truly superior air filtration.

The WeatherMaker 8000TS gas furnace operates at a low stage of heating 90% of the time. This low-speed capacity ensures quiet operation and improved comfort far beyond what can be expected from an ordinary single speed furnace.

comfort

During extreme outdoor temperatures, the WeatherMaker 8000TS gas furnace automatically adjusts to a higher operational speed to ensure consistent comfort. With 80% AFUE (Annual Fuel Utilization Efficiency), this furnace maintains your indoor comfort without sacrificing efficiency. Carrier's patented smart control board constantly monitors and adjusts furnace operation to deliver the highest level of comfort for the least amount of energy. Combined with the two-stage gas valve and the two-speed inducer motor, Carrier's smart control board is prepared to respond to even the most severe outdoor weather conditions.

With an ordinary single-speed gas furnace, your temperature can fluctuate from your desired temperature setting. With the Carrier WeatherMaker 8000TS gas furnace, ComfortHeat™ Technology helps you maintain indoor temperatures closer to your desired setting during every season.

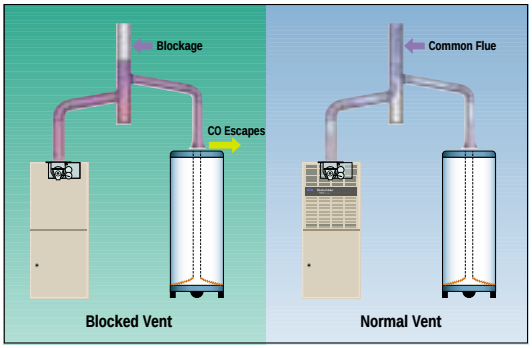

It's an economical choice for home heating.

operation

By gently pushing air throughout your home, the WeatherMaker® 8000TS gas furnace with ComfortHeat™ Technology minimizes operational noise created by air turbulence. Due to the low-stage operation and improved air circulation, the WeatherMaker 8000TS gas furnace greatly reduces the temperature swings and noise caused by continuous on and off cycling. The quiet operation of the WeatherMaker 8000TS gas furnace enhances your overall comfort.

reliability

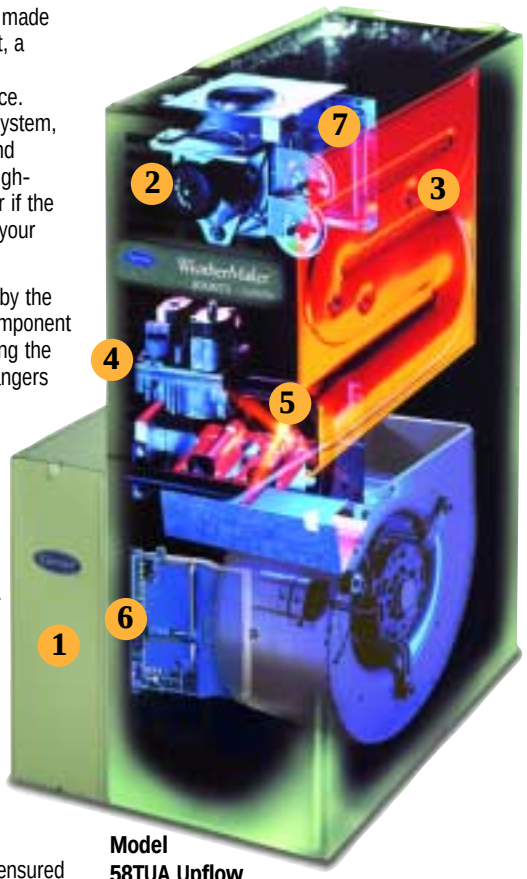

At Carrier, we understand that indoor weather equipment is an investment in your family's comfort. That's why we designed the WeatherMaker 8000TS gas furnace for quality-conscious homeowners like you. In addition to providing precise, consistent indoor comfort, the WeatherMaker 8000TS gas furnace is built to last. The aluminized, crimped seam construction of the Super-S™ heat exchanger resists corrosion. The hot surface ignition safely and efficiently starts the aluminized steel burners for reliable operation.

Carrier's exclusive draft safeguard switch further enhances safety and reliability by automatically shutting down furnace operation if a common vent becomes blocked, preventing harmful flue gases from entering your living space. Even the durable design of the cabinet is built for long-lasting performance. All of these added features, combined with the fact that this furnace is built in an ISO 9001 certified factory, ensures that the WeatherMaker 8000TS gas furnace delivers the custom made comfort and reliable performance that you've come to count on from the experts in custom made indoor weather.

performance

1. **Enhanced indoor air quality** is made easier with our air cleaner cabinet, a standard accessory with the WeatherMaker 8000TS gas furnace. When installed as a part of your system, this cabinet allows for the easy and convenient addition of a Carrier high-efficiency air filter. Ask your dealer if the air cleaner cabinet will work with your specific application.
2. **Economical comfort** is created by the two-speed inducer motor. This component ensures peak efficiency by directing the flow of air through the heat exchangers for improved heat transfer.
3. **Energy-efficient performance** of the WeatherMaker 8000TS gas furnace comes from our heat exchanger. Carrier's Super-S™ Heat Exchanger™ converts more than 80% of the heat from the furnace into useable heat for your home.
4. **Optimum comfort and energy savings** is the result of our two-stage gas valve. The low stage improves comfort on milder days. The high stage ensures comfort during more extreme outdoor weather conditions.
5. **Efficient, reliable operation** is ensured by the hot surface ignition which eliminates the need for typical pilot lights.
6. **Maximum comfort and efficiency** is controlled by a patented smart control board which customizes furnace operation to deliver precise indoor weather.
7. **Protect your family –** Carrier's exclusive draft safeguard switch automatically shuts down furnace operation if a common vent is blocked.

WARRANTY

Carrier takes pride in offering the best indoor weather equipment available. In fact, we offer a 20-year limited warranty on the heat exchanger. The entire WeatherMaker 8000TS is guaranteed by a five-year limited warranty. Ask your indoor weather expert about extended warranties.

Carrier®

Carrier indoor weather systems offer unmatched performance.

gas furnace/air conditioner system

Humidifier
As part of a total indoor weather system, a Carrier humidifier replenishes moisture to dry air.

Evaporator Coil
A Carrier evaporator coil is matched with the proper outdoor unit to provide top cooling efficiency and years of reliable service.

Furnace
Carrier offers a complete line of gas furnaces, including the WeatherMaker 8000TS gas furnace.

Air Cleaner
Carrier air cleaners can substantially improve your indoor weather by removing harmful and irritating airborne pollutants from your home.

Air Conditioner
Carrier's complete line of air conditioners provides reliable, high-efficiency cooling for long-lasting comfort and energy savings. Ask your Indoor Weather Expert about Carrier's environmentally-sound air conditioners with Puron® refrigerant.

Zoning
Comfort zoning allows you to set different temperatures for different areas of your home. Enjoy greater comfort and added energy savings with room-to-room temperature control.

Comfort Ventilator
Carrier's comfort ventilator adds a breath of fresh air to today's tightly constructed home. It combines fresh outdoor air with conditioned indoor air for improved air and energy exchanges.

Thermostat
A Carrier thermostat is your command center. Precise temperature control and programmable features keep you in touch with your comfort.

Matching components provide optimum comfort, efficiency and performance

- Forced-air systems are usually built around an indoor unit, such as a furnace or a fan coil.
- The outdoor unit will be an air conditioner or heat pump combined with a furnace for year-round comfort.
- Air quality is greatly improved with the addition of an air cleaner, humidifier and a ventilator.
- Precise temperature control comes from a Carrier thermostat matched to your indoor weather system.
- Zoning provides the ultimate in control over your custom made indoor weather system.

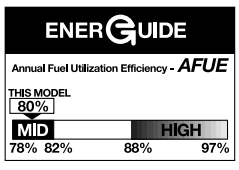

expertise

Carrier has been on the leading edge of indoor weather technology since Willis Carrier began developing products for temperature and humidity control in 1902. Today, Carrier's scientists, engineers, and dealers continue to provide homeowners with the most advanced indoor weather systems available. This technological advantage has enabled Carrier to design, install and maintain customized indoor weather systems to fit the precise needs of individual homeowners.

Your local Carrier dealer provides expert needs analysis and can recommend the perfect combination of Carrier indoor comfort products to meet your unique requirements.

By matching a complete system including air conditioning, indoor air quality, zoning, comfort control and heating with the WeatherMaker® 8000TS gas furnace, your Carrier dealer can help you enjoy greater comfort and lower operating costs, backed by the world's proven leader in indoor weather: Carrier.
