

Performance™ Series Four-Zone System

The power to divide your home and
conquer your comfort

Model ZONECC4ZCN01

The Carrier Difference

The Carrier Performance Series four-zone system answers the call for delivering comfort, flexibility and customized heating and cooling. Most homes have differing comfort needs in different areas. Warm and cozy in the family room...cool and comfy at night for better sleep in the bedrooms...and the basement is largely unoccupied. We put you in control with the ability to set different temperature settings in up to four areas in one home. Just set the temperatures on the individual zone thermostats and help direct comfort to areas that need it.

Compare that to a standard system with one thermostat to set the temperature in the whole home. You wouldn't have one switch to control all of your home's lighting, so why not take advantage of the comfort and efficiency benefits of zoned comfort control?

More Than a Century of Cool

In 1902, a determined engineer answered one of mankind's most nagging questions: How do we make hot, sticky, indoor air go away? In creating the world's first modern air conditioning system, Willis Carrier forever changed indoor life, and, more than a century later, the corporation that bears his name takes inspiration from his example.

Carrier strives to improve on our founder's breakthroughs, introducing new technologies that make life at home even cooler. Today, a nationwide network of experts continues to advance Willis Carrier's lifework. Your expert Carrier dealer is equipped to evaluate your home and create a customized system designed around your lifestyle.

EFFICIENCY

Maximum efficiency is achieved by delivering comfort where and when you need it, and spending less on heating and cooling unoccupied areas. Take it a step further with the option to set a different comfort schedule in each zone for every day of the week. Our Smart Recovery function then makes sure each zone reaches its scheduled temperature in the most economical way possible.

CUSTOMIZABLE COMFORT

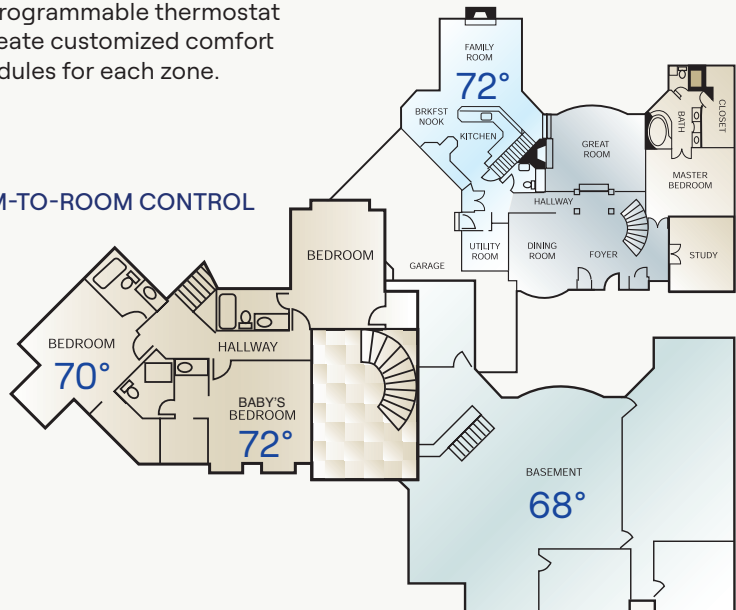

With separate control of up to four zones, you can reduce hot and cold spots for even, consistent comfort. A Carrier thermostat in each zone monitors the temperature in that area and allows you to adjust the setting for that zone. Make it a programmable thermostat to create customized comfort schedules for each zone.

LIMITED WARRANTY

To the original owner, the Performance Series four-zone system is covered by a five-year parts limited warranty upon timely registration. The limited warranty period is three years if not registered within 90 days of installation except in jurisdictions where warranty benefits cannot be conditioned upon registration. See warranty certificate at carrier.com for complete details and restrictions.
