who can help provide solutions that meet your
unique needs and your budget.

There's Simply Nothing More Efficient*

As the inventor of modern air conditioning, Carrier is always thinking of ways to take your comfort to the next level. Any room in your home can become a comfortable space that's all your own with our newest Carrier® Ductless System.

Carrier Delivers Room-by-Room Comfort

We've built our units to deliver all the benefits you want and to perform under the harshest conditions. Carrier® Ductless Systems can be installed in rooms that need it most. Warm drafty bedrooms. Cool stifling corners. Make sunrooms, garages and renovations more comfortable in an easy and convenient way.

Occupancy Sensor

When your unit pays attention, you save energy. Carrier® High Wall Ductless Systems have occupancy sensors that can detect a person in a room, directing airflow either toward or away from them. Or, when someone leaves the room, the unit can shut down, saving you energy and money.

Wi-Fi® Connectivity

Command your Ductless systems from afar. Through Wi-Fi® connection you can control multiple Ductless units on your mobile device. Your system will also be compatible with third-party thermostats.*

*Thermostats with 24V interface.

FLEXIBLE APPLICATION

Humidity Control

Comfort is more than temperature. It also incorporates the balance of moisture in the air. Our Ductless units allow you to precisely control the humidity levels in each space without the hassle and maintenance of portable units.

* According to system ratings maintained by AHRI as of January 22, 2018 in accordance with the AHRI Unitary Small Equipment Operations Manual.
The 9,000 BTUh single zone ductless has a 42 SEER Rating.
