Enjoy Reliable Indoor Comfort

Bryant® Delivers Peace of Mind

Bryant has a history of doing whatever it takes to deliver trusted quality, comfort and value to millions of homeowners nationwide. Today, with rising consumer awareness of environmental issues, Bryant proudly offers an answer that eases those concerns while delivering solid, reliable comfort - the CoastGuard™ Model 213ANC Heat Pump with Puron® refrigerant.

This model helps preserve the integrity of the Earth's ozone layer by using Puron® refrigerant. It delivers reliable comfort at an economical 13 SEER cooling and 8 HSPF heating efficiency. And, with its Microtube™ Technology refrigeration system, the quiet, reliable scroll compressor, and our tough, DuraGuard™ protection package, it provides responsive comfort you can count on, year after year.

Built to Last and Beat the Heat, Too

The Model 213ANC provides lasting comfort and efficiency in a heat pump designed to endure the rigors of a coastal installation. With more than twenty years of research into the effects of salt air, sand and other corrosive elements unique to coastal areas, Bryant has developed a heat pump you can truly rely on. The CoastGuard™ Model 213ANC heat pump features our patented TuffCoat™ coil that has proven to last well

beyond the coils available on most standard models. This unit also features double-sided paint on all external surfaces. By painting both sides of exposed metal surfaces, we eliminate entry points for corrosive elements to help extend the life of the unit. In addition, our DuraGuard™ protection package provides additional coil protection from rocks, sticks, sports and lawn equipment and more.

COASTGUARD™

Limited Warranty

To the original owner, the Bryant CoastGuard™ Model 213ANC heat pump is covered by a 10-year parts limited warranty upon timely registration of your new equipment.* Bryant is so confident in the reliability of this unit that we are also offering 5 years of seacoast corrosion coverage. Ask your Bryant dealer about optional extended warranties, which may include labor.

**Warranty period is 5 years if not registered within 90 days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts warranty. See warranty certificate at Bryant.com for complete details.*

Performance

Salt-Water Tested, Proven Performance

Bryant quality and reliability testing exceed industry standards, and the CoastGuard™ Model 213ANC heat pump is no exception. These products are installed in a testing lab, are exposed to a salt water fog for one hour, and then allowed to dry for one hour. This wet-to-dry cycling is an accurate representation of sea coast applications. We also force a salt spray of synthetic sea water through the coil to further duplicate coastal conditions.

When you put it all together, Bryant CoastGuard heat pumps deliver the comfort you need with the lasting durability you deserve.

Feeling Good About Feeling Comfortable

With the Model 213ANC, you join the growing ranks of homeowners who choose Puron® refrigerant. The Bryant environmentally sound refrigerant keeps you cool without depleting the Earth's ozone layer.

In addition, the Model 213ANC inspires the confidence of owning a system developed by a company committed to customer satisfaction. From initial design, through development testing and our 5-step, 100% run test during assembly, we go beyond the industry's expectations for quality to be sure that every unit we make measures up to even tougher standards – yours.

Home Comfort Components

1 ENERGY-EFFICIENT

Our scroll compressor is designed to provide quiet, smooth-operating comfort and years of trouble-free performance.

2 RELIABLE PERFORMANCE

Bryant's Microtube™ Technology refrigeration system with copper tube/aluminum fin coil maximizes transfer of heat outside your home to ensure cooling efficiency. TuffCoat™ epoxy protection ensures lasting protection against coastal area galvanic corrosion.

3 LASTING COMFORT

The filter drier protects the unit's most important single component: the compressor.

4 BUILT TO LAST

Bryant's DuraGuard™ protection package ensures lasting durability and good looks through years of exposure to weather, sports and lawn equipment and more. Three key elements to this package include: a galvanized steel cabinet, steel coil guard and baked-on powder paint. The entire unit is backed by 5 year seacoast corrosion coverage.

Model 213ANC

CoastGuard™ unit

Standard unit

Testing has shown the TuffCoat™ coil to last longer than a standard coil in harsh coastal conditions.
