Enhanced Comfort and Efficiency
for Unique Indoor Comfort Needs

Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

For even, consistent comfort in a variety of unique indoor environments, Carrier offers the Performance™ series ductless variable-speed high wall air conditioner or heat pump. It's an elegant, quiet and comfortable value for providing heating and cooling in areas typical forced-air systems can't.

Designed to Fit

1

1

Flexible and Unobtrusive

With its smooth, clean profile, the wall-mounted indoor unit easily blends into most interiors. Once installed, this unit directs conditioned air with motorized louvers that can “sweep” to spread comfort throughout the space or can be “locked in” to direct airflow to a specific area.

2

Easy, Consistent Comfort

Indoor temperatures are set with the intuitive, easy-to-use remote. Variable-speed operation allows the system to gradually adjust performance based on changes in room temperature, keeping occupants consistently comfortable. Dehumidification mode enhances comfort during hot, sticky summers.

Versatile and Economical

The Carrier® Performance series ductless variable-speed high wall air conditioner or heat pump is the ideal solution for indoor spaces where a ducted, forced air system is not an option. Perfect for a home office, garage or attic conversion, or many other unique locations, this system delivers fully-featured comfort up to an energy-saving 16.0 SEER cooling efficiency. It uses Puron® refrigerant, an environmentally-sound alternative to R-22 refrigerant. And, whether your space is well-used or rarely used, it's an economical choice that can deliver comfort when you need it.

Extra-Quiet, Relaxing Comfort

With variable-speed operation and longer, smoother comfort cycles, the Performance series ductless variable-speed high wall indoor unit can be quieter than a whisper (as low as 32 dBA). Offering an unobtrusive design, easy and convenient operation and the backing of the world's first name in comfort, this system is a comfortable, economical choice for your unique heating and cooling needs.

Limited Warranty

Carrier warrants its ductless products installed in owner-occupied residential applications with a five-year parts and seven-year compressor limited warranty. See warranty certificate at carrier.com for complete details and restrictions.
