COMFORT WITH CONFIDENCE

Airquest ultra-low NOx gas furnaces deliver the soothing warmth of natural gas heating while meeting the South Coast Air Quality Management District and San Joaquin Valley Air Pollution Control District NOx emissions limits. With significantly reduced emissions compared to standard and low-NOx models, they provide the durability and comfort you deserve during the colder seasons. For continued comfort when the weather warms up, add a properly matched Airquest air conditioner or heat pump to create a complete Airquest indoor comfort system.

WHAT MATTERS IN A GAS FURNACE?

ENERGY SAVINGS

AFUE (Annual Fuel Utilization Efficiency) measures the heating efficiency of a gas furnace. The higher the number, the greater the potential for energy savings. Ion[®] System and Performance Series furnaces offer a range from 80% up to 95% AFUE.

CONSISTENT COMFORT

To keep your comfort consistent, our Ion 95 ultra-low NOx furnace operates nearly continuously, making subtle adjustments to adaptable-speed components to match the changing conditions of your home.

EASY TO CONTROL

Easily manage your entire home's comfort using the communicating Ion system control via its full-color touch screen, Ion Home mobile app or voice commands.

QUIET PERFORMANCE

Enjoy quiet system performance by selecting models with insulated cabinet components.

PEACE OF MIND

Rest easy with a 10-year parts and lifetime heat exchanger limited warranty* (on select models) upon timely registration.**

WHAT SETS AIRQUEST ION AND PERFORMANCE ULTRA-LOW NO_x GAS FURNACES APART?

Reliable – Our hot surface ignition system features an advanced silicon nitride igniter and in-shot burners for reliable comfort you can count on.

Ultra-Low NO_x – Pre-mix burner technology within our burner box contributes to 65% less NO_x emissions than a standard low-NO_x furnace.

System Control – State-of-the-art electronic controls monitor system operation and allow for faster, easier system diagnostics.

Quiet – Solid, pre-painted steel insulated cabinet with tight-fit door latch, isolated blower motor, and soft-mount rubber gaskets on key components contribute to quieter operation.

**N80MSU
Gas Furnace**

Safety – Temperature limit control, reliable gas valve and induced draft motor all promote safe operation.

Efficiency – Ion System furnaces include variable-speed constant airflow ECM fan motors and Performance Series models include a multi-speed ECM blower motor to provide exceptional efficiency. When matched with a Airstream air conditioner or heat pump and a humidity-sensing thermostat, our furnaces can provide enhanced dehumidification and the potential for additional energy savings.

Ion System Control – Our innovative Ion System Control includes full-color touch screen technology for intuitive and powerful command over temperature, humidity, comfort scheduling, energy management and more.

THE BENEFITS OF ULTRA-LOW NO_x EMISSIONS

Airborne NO_x combines with other pollutants in ways that can affect human health and the environment by contributing to smog, acid rain, algal blooms and the deterioration of water quality.[†] With a 65% reduction in NO_x emissions compared to a standard low NO_x model, a Airstream ultra-low NO_x gas furnace makes sense for the environmentally aware homeowner.

EXCEPTIONAL PEACE OF MIND

Our No Hassle Replacement™ limited warranty backs every Airstream Ion System product. It means comfort with no questions. We'll replace your unit if the heat exchanger fails within the covered period.* This provides extra coverage in addition to a 10-year parts limited warranty.**

COMPONENTS OF A COMPLETE AIRQUEST SYSTEM

We offer a complete family of products designed to provide year-round comfort, control and efficiency. Your Airstream dealer can help create a properly matched system to best fit your needs and your budget.
