Heating & Cooling Products

It's no secret that ductless and traditional HVAC systems each have their own set of advantages. So why not reap the benefits of both? You can with Keeprite Hybrid Solutions.

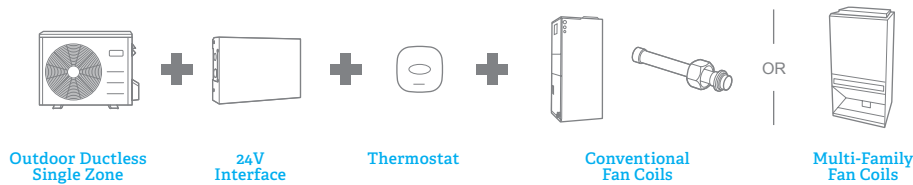

Get the versatility and flexibility you've been looking for by combining your traditional indoor HVAC equipment with advanced ductless outdoor technology.

With gas, electric and whole home solutions available, the Keeprite hybrid solutions are great for any space or application. From basements and sunrooms, to new additions and remodels, we've got your biggest heating and cooling challenges covered.

Two Combination Options for Enhanced Convenience

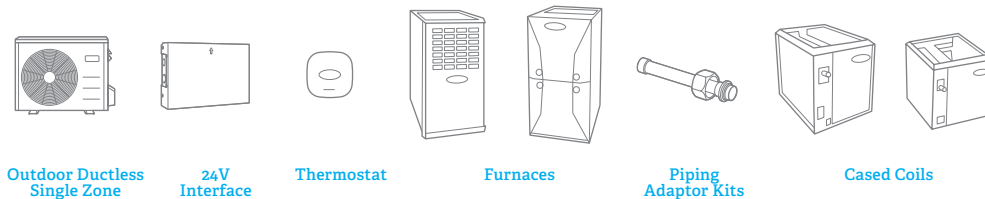

Hybrid Solution with Conventional Fan Coils

Uses electric— efficient and environmentally friendly with no carbon emissions.

Hybrid Solution with Furnace / Cased & Uncased Coils

Uses electric and gas— utilized where natural gas or propane is available and additional heating is required.

Say Hello to a New Level of Performance & Comfort

Keeprite Hybrid Solutions unite the best of both ductless and traditional HVAC.

That means you get the quiet operation, small footprint and enhanced efficiency of ductless and the high performance of traditional units—even in the harshest of outdoor conditions. All in a single hybrid system.
