## KeepRite® fan coils

KeepRite fan coils offer our best comfort in all seasons, from the highest featured Ion™ System communicating fan coil to the budget-friendly, with available variable-speed or multi-speed ECM fan blowers.

### What is a fan coil?

KeepRite fan coils are designed for enhanced durability and comfort. The fan coil is an indoor section that needs to be properly matched with an outdoor air conditioner or heat pump. The indoor and outdoor sections can be customized to provide air conditioning, heat pump heating, and/or electric heating.

## Backed by exceptional warranties

Our No Hassle Replacement™ limited warranty backs every KeepRite Ion™ System product. It means comfort with no questions. We'll replace your unit if the evaporator coil fails within the covered period.\* This provides extra coverage in addition to a 10-year parts limited warranty.\*\*

Timely registration required. See warranty certificate for details and restrictions.

- \* See No Hassle Replacement limited warranty certificate for complete details and exclusions.
- \*\* Timely registration required for 10-year parts limited warranty. Limited warranty period is five years for parts if not registered within 90 days of installation except in jurisdictions where warranty benefits cannot be conditioned upon registration. ## What matters in a fan coil?

Get the most out of an indoor section by choosing the fan coil that fits your comfort needs. All of our fan coils include comfort enhancing and durable features to deliver lasting performance. For the maximum combination of comfort, efficiency and convenience, ask about our Ion™ System communicating models with Wi-Fi® capability. For greater efficiency in a unit, look for variable-speed ECM fan blowers. Our No Hassle Replacement™ limited warranty is offered on our premium products to give you peace of mind. KeepRite® fan coils offer efficiency, increased comfort, durable performance, and quiet operation.

## Efficiency ratings – what do they mean?

**Seasonal Energy Efficiency Ratio (SEER)** – Measures the cooling efficiency of air conditioners and heat pumps during an average cooling season. The higher the SEER, the greater the energy economy.

**Heating Seasonal Performance Factor (HSPF)** – Measures the heating efficiency of heat pumps. The higher the HSPF, the greater the efficiency and energy savings potential during heat pump heating.

**Energy Efficiency Rating (EER)** – Measures the cooling efficiency of air conditioners and heat pumps during a set temperature (95° F).

**Annual Fuel Utilization Efficiency (AFUE)** – Measures the heating efficiency of a gas furnace. The higher the AFUE, the greater the gas heating efficiency and energy savings potential.

**ENERGY STAR®** – A U.S. Environmental Protection Agency program to identify and promote energy-efficient products in order to reduce energy consumption.
