CONNECTING THE DOTS
EVOLVING YOUR COLD CHAIN

INTRODUCING LYNX FLEET: Revolutionizing Cold Chain Management

For over 50 years, Carrier has led the way forward in refrigerated transport products and services for customers worldwide. We understand the critical importance of maintaining the integrity of temperature-controlled products throughout the supply chain amid ever-changing climate conditions. That's why we continue to innovate, embracing next-generation technologies to confidently accompany our customers into the future.

> 1 EFFICIENCY

Lynx™ Fleet provides essential data to maintain regulatory compliance in critical markets, ensuring operational efficiency without unnecessary complexities.

- Optimize your fleet deployments by utilizing current asset locations and historical usage data to enhance efficiency. Lynx Fleet's energy reporting capabilities offer valuable insights into fleet utilization and best practices to ensure optimal efficiency.
- Lynx Electrification provides fleet managers with comprehensive views of current and historic battery management practices to ensure optimal battery usage for your electric refrigeration assets.

> 2 SUSTAINABILITY

At Carrier, we help provide insights into CO₂ emission reductions. Our solutions enable customers to leverage operational support to comply with emerging emissions regulations in key markets through a proactive electric transport refrigeration unit monitoring system designed to propel you into a zero-emissions world.

- Understand how your electric fleet is improving your organization's carbon footprint through the Lynx Electrification reporting capabilities that provides estimated energy consumption and savings realized with your electric assets.
- Use the Lynx Fleet tools and reports to drive more sustainable practices with both your electric and diesel fleets.

>3

PERFORMANCE

Designed to be used with Carrier Transicold equipment, Lynx Fleet puts the power of centralized data streams at your fingertips. Lynx Fleet offers real-time temperature monitoring, service alert systems, dwell time reporting, and fuel cost control to help you manage your fleet of refrigerated units.

- Use Lynx Fleet's real-time monitoring capabilities to continuously track temperature, location, and operational status, ensuring that perishable goods are maintained at optimal conditions throughout transit.
- Leverage Lynx Fleet's in-depth performance insights into the performance of the refrigeration unit to enable fleet managers to quickly respond to issues and avoid asset downtime.
- Utilize Lynx Fleet's capabilities to view events or issues that occurred during a route, providing a comprehensive view of performance throughout the journey

>4

FUTURE-READY

Lynx Fleet is designed with your future in mind by leveraging AI, Machine Learning, and IoT technologies to adapt to your business needs. This ensures you stay ahead of industry trends and challenges by providing real-time insights, predictive analytics, and enhanced operational efficiencies.

- Lynx Fleet's platform evolves alongside your fleet, providing adaptable and flexible solutions that cater to the demands of a rapidly changing market.
- Gain a comprehensive view of your fleet's performance and operations, enabling you to manage assets more effectively and plan for future growth.
- Our commitment to sustainability drives continuous innovation, ensuring that Lynx Fleet remains at the forefront of environmentally sustainable practices and technologies.

Streamlined Implementation and Retrofitting

Because most of our units now come equipped with Lynx as a standard, you can enjoy system compatibility and easy activation without disrupting your operations. And since Lynx Fleet can be retrofitted, you can unlock the advantages of remote monitoring and advanced data analytics without the need for a complete overhaul. The result? You benefit from a streamlined implementation process and the ability to optimize your entire fleet, regardless of its composition or age.
