Optimized for CO₂OLtec® Evo

Adapted for Evolution 6 vertical cabinets, the 2nd generation CO₂OLtec® Evo system operates on natural refrigerant CO₂ and combines several innovations to optimize the total CO₂ system efficiency:

- Energy saving heat exchangers
- Ejector operation optimized expansion valves
- Extended operation flexibility: All 60 bar CO₂ evaporators now operate with 90 bar expansion valve and 90 bar liquid line

E6 Mirado® & E6 Morea®

Prime Line

Open semi-vertical multideck with a modern and space optimized design

Operation optimizer / Space optimizer

Benefits at a glance

- Maximum display opening by slim canopy
- Ergonomic height
- Floor space efficient design
- Enhanced visibility in the store

Standard configuration

- Manual night blinds
- Stepped display shelves with 40mm scanner price rails
- Integrated bumper and single-piece front kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas) / Mirado® 63.M1-2 with backwall evaporator (F-gas)
- Multiplex kit

Customization

- LED selection for canopy lighting, shelf lighting and front shelf lighting
- Stainless steel interior
- Large selection of shelves, price rails and front stoppers
- Plinth bumper for increased protection
- Bottom evaporator (CO₂) / Mirado® 63.M1-2 with backwall evaporator (CO₂)
- Reinforced (additional) front bumper

The semi-vertical size provides ergonomic height and customer contact on eye level

The maximum display opening and the stepped display shelves offer the best presentation of your products

The backwall evaporator of Mirado® 63 provides benefits such as a maximum front opening and self cleaning effect by defrosting

Prime Line

Closed semi-vertical multideck with a modern and space optimized design

Operation optimizer / Space optimizer

Benefits at a glance

- Maximum display opening by slim canopy
- Ergonomic height
- Floor space efficient design
- Enhanced visibility in the store

Standard configuration

- Sliding fully Transparent door
- Stepped display shelves with 40mm scanner price rails
- Integrated bumper and single-piece front kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas) / Mirado® 63-GS.M1-2 with backwall evaporator (F-gas)
- Multiplex kit

Customization

- Horizontal LED lighting for canopy, shelf and front shelf
- Stainless steel interior
- Large selection of shelves, price rails and front stoppers
- Plinth bumper for increased protection
- Bottom evaporator (CO₂) / Mirado® 63-GS.M1-2 with backwall evaporator (CO₂)
- Reinforced (additional) front bumper

The semi-vertical size provides ergonomic height and customer contact on eye level

The standard bottom evaporator ensures a balanced floor space efficient design for the best placement in the center of your store, no matter if supermarket, hypermarket or discounter

Mirado® 63-GS comes with backwall evaporator which provides maximum display opening together with high service durability of fans and evaporator

E6 Methos

Prime Line

Open multideck with an optimized footprint and best customizable design

Narrow merchandiser / Space optimizer

Benefits at a glance

- Highest footprint productivity
- Largest selection of configurations
- Easy access to evaporator and fans
- Optimized design for back-to-back installation

Standard configuration

- Motorized night blind (30-50% less energy consumption)
- Display shelves with single side coating and 40 mm scanner price rails
- Integrated bumper and kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas)
- Multiplex kit

Customization

- Horizontal LED lighting for canopy, shelf and front shelf
- Dimming box for Premium LED lighting
- Stainless steel interior
- Large selection of shelves, price rails and front stoppers
- Reinforced (additional) front bumper
- Bottom evaporator (CO₂)

The installed bottom evaporator provides the best floor space productivity among all multideck cabinets for your turnover

Reinforced (additional) front bumper for increased protection of the cabinet

The optimized small footprint design makes the Methos multidecks perfect for space saving back-to-back installations in your market (stainless steel bumper by local customization)

E6 Methos GD

Prime Line

Closed multideck with an optimized footprint and best customizable design

Narrow merchandiser / Space optimizer

Benefits at a glance

- Highest footprint productivity
- Largest selection of configurations
- Optimized design for back-to-back installation
- Easy access of evaporator and fans

Standard configuration

- Swing insulated All-glass Frameless door with small dark grey print and solid mullion
- Display shelves with single side coating and 40 mm scanner price rails
- Integrated bumper and kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas)
- Multiplex kit

Customization

- Large selection of various door options:
 - Swing fully Transparent door with or without mullion (Transparent Gap Cover)
 - Swing fully Transparent door with Anti-reflex coating with or without mullion (Transparent Gap Cover)
 - Ultra slim fully Transparent 400mm door with or without mullion (Transparent Gap Cover)
- Horizontal LED lighting for canopy, shelf and front shelf
- Vertical LED lighting for door mullion, dividing wall and endwall
- Dimming box for Premium LED lighting
- Stainless steel interior
- Large selection of shelves, price rails and front stoppers
- Reinforced (additional) front bumper
- Bottom evaporator (CO₂)

The installed bottom evaporator provides the best floor space productivity among all multideck cabinets for your turnover

The optimized small footprint design makes the Methos GD multidecks perfect for space saving back-to-back installations in your market (Inox bumper by local customization)

E6 Methos GD with 400 mm Doors

Benefits at a glance

- Slim 400 mm doors for high footprint sales productivity
- Space saving design for small stores with narrow aisles
- Full transparent door parts for better product visibility

Opened 400 mm slim doors provide 35 % floor space saving compared to 625 mm standard doors

Semi-Verticals & Multidecks

E6 Monaxis®

Prime Line

Open multideck for best product presentation with lowest life cycle costs

Operation optimizer

Benefits at a glance

- Lowest life cycle costs
- Best maintenance conditions
- Energy efficient design
- Attractive product presentation

Standard configuration

- Low front height (295 mm)
- Carrier's Temperature Equalizer System
- Double air curtain for cabinets with temperature class M1 (approx. 10% less energy consumption)
- Display shelves with 40mm scanner price rails and product stoppers
- Integrated front bumper and kickplate
- BREEZtec® EC fans (Carrier's Next Generation Air Circulation System) available in H2 2022
- Backwall evaporator (F-gas)
- Multiplex kit

Customization

- Night blind options:
 - Motorized (30-50% less energy consumption)
 - Motorized with efficient cover (40-70% less energy consumption)
 - Manual night blind cover (30% less energy consumption)
- Horizontal LED lighting for canopy, shelf and front shelf
- Dimming box for Premium LED lighting
- Stainless steel interior
- Large selection of shelves, price rails and front stoppers
- Reinforced (additional) front bumper and endwall
- Plinth front bumper and endwall
- Backwall evaporator (CO₂)

The backwall evaporator enables easy installation and maintenance due to a total clearance height of 125 mm

The closed motorized nightblind with efficient cover saves 40-70% energy compared to the open operation

Easy to clean bottom area by backwall evaporator with simple access of the expansion valve

E6 Maress® & E6 Maress® GD

Prime Line

Open/closed multideck for heavy product load with optimized life cycle cost

Volume seller

Benefits at a glance

- Maximum front opening
- Perfect design for heavy product load & box stacking
- Short service and maintenance times
- Optimized life cycle cost

Standard configuration

- Ultra-low front (220 mm)
- Carrier's Temperature Equalizer System
- Open cabinets with double air curtain (approx. 10% less energy consumption)
- Closed cabinets with swing fully Transparent door with solid mullion
- Display shelves (open cabinet with heavy-duty bottom display deck)
- Integrated front bumper and kickplate
- BREEZtec® EC fans (Carrier's Next Generation Air Circulation System)
- Backwall evaporator (F-gas)
- Multiplex kit
- Maress® 82.M2-2 D with motorized night blind (30-50% less energy consumption)

Customization

- Night blind options for open cabinets:
 - Motorized (30-50% less energy consumption)
 - Motorized with efficient cover (40-70% less energy consumption)
- Closed cabinets with large selection of door options:
 - Swing fully Transparent door without mullion (Transparent Gap Cover)
 - Swing fully Transparent door with Anti-reflex coating with or without mullion (Transparent Gap Cover)
- Horizontal LED lighting for canopy, shelf and front shelf
- Closed cabinets with vertical LED lighting for door mullion, dividing wall and endwall
- Dimming box for Premium LED lighting
- Stainless steel interior
- Large selection of shelves, price rails and front stoppers
- Backwall evaporator (CO₂)

The backwall evaporator enables easy installation with short service and maintenance times

The ultra-low front height of only 220 mm provides a maximum front opening

The Maress® product family is perfectly designed for heavy product load and stacking of boxes

E6 Monaxis[®]-R

Prime Line

Open roll-in multideck with a robust & energy efficient design

Volume seller

Benefits at a glance

- Robust cabinet for heavy product load
- Fast and easy loading
- Hygienic cabinet design

Standard configuration

- Lifiable Low front height (295 mm)
- Motorized night blind (30-50% less energy consumption)
- Easy to use front lift allows use of roll-in trolley
- Carrier's Temperature Equalizer System
- Dual air curtain for approx. 10% less energy consumption
- Display shelves with wire fences (lower shelf with air control) with 40 mm scanner price rails
- Integrated front bumper and kickplate
- Energy efficient EC fans
- Backwall evaporator (F-gas)
- Multiplex kit

Customization

- Motorized night blind with efficient cover (40-70% less energy consumption)
- Horizontal LED lighting for canopy, shelf and front shelf
- Dimming box for Premium LED lighting
- Large selection of shelves, price rails & front stopper
- Reinforced (additional) front bumper and endwall
- Backwall evaporator (CO₂)

Robust cabinet design for heavy product load and box stacking

The easy-to-handle, movable front mechanism, allows the use of roll-in trolleys or pallets for stocking of heavy stacked products

The dual air curtain provides optimized temperature distribution inside the Roll-in cabinet

E6 Mendos®

Value Line

Basic open multideck with the highest footprint productivity

Space optimizer

Benefits at a glance

- Very high footprint productivity
- Optimized design for back-to-back installations
- Easy access of evaporator and fans

Standard configuration

- Motorized night blind (30-50% less energy consumption)
- Display shelves with single side coating and 40 mm scanner price rails
- Integrated bumper and kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas)
- Multiplex kit

Customization

- Horizontal LED lighting for canopy, shelf and front shelf
- Large selection of shelves, price rails and front stoppers
- Bottom evaporator (CO₂)
- Transparent raised front to reduce energy consumption

The installed bottom evaporator provides the best floor space productivity among all multideck cabinets for your turnover

Backwall mirrors greatly enhance product visibility

Product stoppers protect air flow and improve presentation

E6 Mivit[®] & E6 Mivit[®] GD

Value Line

Basic multideck design with high standards

Narrow displayer / Volume seller

Benefits at a glance

- Maximum front opening
- Open/closed E6 Mivit[®] 52 with slim footprint at highest total display area
- E6 Mivit[®] 82 GD designed for box stacking capacity for high turnover

Standard configuration

- Ultra-low front (220 mm)
- Closed cabinets with swing insulated All-glass Frameless door with small light grey print and solid mullion
- Display shelves and 40 mm scanner price rails
- Integrated bumper and kickplate
- Back evaporator (F-gas)
- Multiplex kit
- Mivit[®] 52 open & closed with BREEZtec[®] EC fans (Carrier's Next Generation Air Circulation System)

Customization

- Night blind options for open cabinets:
 - Motorized (30-50 % less energy consumption)
 - Motorized with efficient cover (40-70 % less energy consumption)
- Closed cabinets with swing fully Transparent door and solid mullion
- Horizontal LED lighting for canopy, shelf and front shelf
- Closed cabinets with vertical LED lighting
- Backwall evaporator (CO₂)
- Transparent raised front for Mivit[®] 52 to reduce energy consumption

The backwall evaporator provides maximum display opening and self cleaning effect by defrosting

The ultra-low front height of only 220 mm provides a maximum front opening

Easy to clean bottom area by backwall evaporator with simple access of the expansion valve

E6 Mirado® FV

Ultrafresh Line

Open semi-vertical multideck with optimized design for ultrafresh goods

Space optimizer / Operation optimizer

Benefits at a glance

- Maximum display opening by slim canopy
- Ergonomic height
- Special shelving for F&V presentation
- Enhanced visibility in the store

Standard configuration

- Stepped display shelves with 50 mm wire fence
- Sheet metal design for rear wall
- Integrated bumper, integral bumper and single-piece front kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas) / Mirado® 63.M1-2 with backwall evaporator (F-gas)
- Multiplex kit

Customization

- Manual night blinds
- LED selection for canopy lighting, shelf lighting and front shelf lighting
- Stainless steel interior
- Large selection of shelves, price rails and front stoppers
- Plinth bumper for increased protection
- Reinforced (additional) front bumper
- Bottom evaporator (CO₂) / Mirado® 63.M1-2 with backwall evaporator (CO₂)
- Stepped display shelves with brackets (up to 27°) and reinforced scanner price rails

The semi-vertical size provides ergonomic height and customer contact on eye level

The maximum display opening and the stepped display shelves offer the best presentation of your products

Display shelves with brackets (up to 27°) and reinforced scanner price rails for best product presentation

E6 Program Features

All 60 bar CO₂ evaporators operate with 90 bar expansion valve and 90 bar liquid line

Benefits

- Modern design concept
- Increased display area
- Flexibility in merchandising
- EN ISO 23953 classification
- Energy & service efficiency
- Reduced lifecycle cost

Approx. 11%
larger glass area

25 mm shelf
spacing

Numbered shelving

Price rail located
close to products;
stopper included

Improved
lighting

BREEZtec®

Carrier's Next Generation Air Circulation System

Energy & economical efficiency

- Reduction of energy consumption from 30 to 45% compared to conventional EC fans¹
- Energy cost savings per cabinet result from 50 to 70 Euro per year²
- Designed for a high service durability

Operation & noise emissions

- Provides homogeneous and highly efficient temperature distribution by combining Carrier Temperature Equalizer System (TES) and EC fan motors
- Reduced sound pressure level by up to -4dBA
- Better noise quality by smooth spectrum with lower tonal content

Application

The new BREEZtec® air circulation system is optimized for all remote E6 Multidecks and E6 Semi-Verticals with back evaporator design.

Latest EC fan motor technology with new Carrier patented fan housing and fan blade design for improved energy efficiency and reduced noise emission.

Remote multideck with back evaporator design showing the position of the new Carrier fan technology and the optimized air circulation inside the cabinet for a better homogeneous product storage temperature.

Premium Power LED for Canopy

Temperature Equalizer System + dual air curtain

Modern clean design

Optimized air management

Minimum distance bottom shelf to lowest shelf level: 295mm

Higher evaporating temperature

Cabinets fulfill temperature class M0, M1 or M2 according to EN ISO 23953

Insulated all-glass doors (Frameless with small print or fully Transparent)

E6 Glass Door Program Multidecks

To increase display area and maximize the visibility of the products with the optimized energy efficiency

E6 Virando® 63

Prime Line

Semi-vertical freezer for the new center of your market

Benefits at a glance

- Large loading volume at low height
- Ideally suited for market center installations
- Perfectly combinable with chiller semi-verticals from E6 Mirado® range

Standard configuration

- Black Anti-Fog (AF) all-glass doors
- Black ergonomic door handles
- Wire shelves with front to back rods
- Vertical LED lighting for mullions
- Integrated bumper and kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas)
- Multiplex kit

Customization

- Horizontal LED lighting for canopy
- Large selection of display baskets, wire shelves, bottom racks and wire dividers
- Plinth front bumper and endwalls
- Bottom evaporator (CO₂)

Perfectly combinable with semi-vertical chiller E6 Mirado® to present a large range of products in small place

Semi-vertical low height of only 1,60m enhances vision and display in your market and improves the contact between customers

Wide range of accessories with wire shelves, display baskets and telescopic display baskets for easy loading

Prime Line

Narrow vertical freezer with outstanding footprint productivity for limited space

Narrow merchandiser

Benefits at a glance

- Large loading volume for a narrow footprint
- High footprint sales productivity
- Excellent product visibility

Standard configuration

- Total depth of only 765 mm
- Anti-Fog (AF) doors with aluminium frame
- Ergonomic door handles
- Slim brackets with 25 mm shelf spacing and numbering
- Vertical LED lighting
- Bottom evaporator (F-gas)
- Energy efficient EC fans

Customization

- Panorama endwalls
- Bottom display baskets
- External bumper for increased protection
- Bottom evaporator (CO₂)

Narrow freezer with a total depth of only 765 mm

Panorama endwall for a better product visibility

Slim brackets with 25 mm shelf spacing for an improved loading of products

E6 Velando® AF

Prime Line

Premium vertical freezer with large storage capacity

Space optimizer

Benefits at a glance

- Enhanced visibility of presented goods
- Large storage capacity
- Simplified maintenance
- Lower energy consumption with optional High Efficiency Frame

Standard configuration

- Anti-Fog (AF) non-heated passive glass doors
- Ergonomic door handles
- Vertical LED lighting
- Two piece cabinet front with bumper profile
- Single piece front kickplate
- Energy efficient EC fans
- Bottom evaporator (F-gas)
- Multiplex kit

Customization

- High Efficiency Frame (HEF) reduces energy consumption
- Panorama and non-glazed endwalls
- Horizontal LED lighting for canopy
- Large selection of display baskets, wire shelves, bottom racks, wire dividers and pricing rails
- Bulk section with telescopic basket
- Plinth front bumper and endwalls
- Bottom evaporator (CO₂)

Wide range of accessories with wire shelves, display baskets and telescopic display baskets for easy loading

The optional High Efficiency Frame with glass fiber-reinforced plastic significantly reduces the vertical freezers energy consumption

E6 Velando® AF with High Efficiency Frame (HEF) provides the best energy performance within freezer cabinet portfolio

E6 Irios® GL

Prime Line

Closed island – transparency on the next level

Benefits at a glance

- Increased transparency for better product visibility from all sides
- Comfortable and ergonomic product access
- Modern square design & various customization options for individual style

Standard configuration

- Push-T glass lid system for longitudinal cabinets
- Push-3 glass lid system for crown end (CE) cabinets
- Slim handrail located on lower level at only 89,5 cm height for better product access
- Exterior plastic profile color in dark grey or light grey*
- Fully glazed panorama endwalls
- Improved LED handrail lighting
- Integrated bumper
- Dark grey handle
- Interior price rail near handrail

Customization

- Transparent handle
- External bumper for increased protection
- Customizable claddings for example in wooden pattern*
- Improved LED lighting for sidewalls
- Improved LED lighting for middle wall*
- Gable price rail with two or three partitions (40 mm or 60 mm)
- Square stainless-steel bumper for increased protection
- Removable 1,25 m glass superstructure shelf with price rails for product load up to 60 kg/module

15% larger glass surfaces and improved LED lighting on handrails, middle beam* and sidewalls for excellent product visibility

Easy to open, curved glass lids reducing light reflections and transparent profiles provide perfect transparency

Fully glazed panorama endwalls and sidewalls with optional cladding* in wooden pattern and stainless steel bumpers

* This feature is available from approx. Q3-2022 (availability needs to be confirmed before ordering)

Open chiller island – highlighting your special products

Space optimizer

Benefits at a glance

- Modern squared design with frameless 360° glazing
- Excellent display for pre-packaged products
- Enhanced product visibility with various cladding options

Standard configuration

- Single front glass panel
- Panoramic endwall
- Paintable metal front panel for individual style
- Fully glazed panorama endwalls
- Energy-efficient EC fans
- Bottom evaporator (F-gas)

Customization

- Wooden front panel
- Squared stainless steel bumpers on the fronts and sides, 20x20mm (brushed)
- External bumper for increased protection
- Stainless steel interior
- Premium LED for canopy (middle beam)
- Plinth lighting with Premium LED for an attractive store atmosphere
- Bottom evaporator (CO₂)

Cladding options available in wood or metal with or without stainless steel bumpers

Optional external lighting at the bottom of the island provides an inviting ambience in the store

Frameless front single glazing and panoramic endwalls ensure best product visibility

Closed freezer and chiller island with classic basic design

Space optimizer

Benefits at a glance

- Available as freezer and chiller cabinet
- Large product facing area
- Flexible layout
- Heavy product load

Standard configuration

- Curved, frameless sliding glass lids for longitudinal cabinet
- Flat sliding glass lids for crown end
- Insulating front glass with 385 mm height
- White powder-coated internal fittings
- Superstructure for price rails with two partitions
- Single-piece kickplates
- Energy efficient EC fans
- Bottom evaporator (F-gas)
- Multiplex kit

Customization

- Push-2 or Push-3 glass lids
- Aluminium handrail
- LED lighting for handrail & front and back
- Island superstructures for optimized footprint productivity
- Large selection of wire shelves, covers, product divider and price rails
- Reinforced front bumper, endwall and dividing wall
- Plinth front bumper and endwall
- Bottom evaporator (CO₂)

Irios® GL+ is available in temperature class M2 and L1 to present normal or low temperature goods

The durable design is perfectly suitable for heavy product loads

Superstructures for price rails with 3 partitions and additional dry superstructure shelf to extend your sales per m²

Ivando® GL+ & Wisalo® GL+

Value Line

Closed island with dual compartment for high sales flexibility

Flexible merchandiser

Benefits at a glance

- Ivando® GL+ with dual compartments allows the use of two temperature ranges in one island
- Wisalo® GL+ for an optimal freezer solution for wallside displays
- High cabinet flexibility

Standard configuration

- Ivando® GL+ with two separately refrigerated display compartments
- Ivando® GL+ & Wisalo® GL+ with curved, frameless sliding glass lids
- Flat sliding glass lids for Ivando® GL+ crown end
- Insulating front glass with 385 mm height
- White powder-coated internal fittings
- Superstructure for price rails with two partitions
- Single-piece kickplates
- Energy efficient EC fans
- Bottom evaporator (F-gas)
- Multiplex kit

Customization

- Push-2 or Push-3 glass lids
- Aluminium handrail
- LED lighting for handrail & front and back
- Large selection of wire shelves, covers, product divider and price rails
- Reinforced front bumper, endwall and dividing wall
- Plinth front bumper and endwall
- Bottom evaporator (CO₂)

The two separately refrigerated display compartments permit joint presentation of normal and low temperature products in one cabinet

The classic island design with large-sized glass panels provides a clear view of the product variety even from long distances

The wallside display of Wisalo® GL+ is the optimal supplement for the freezer solution in your market

AIB GL+

Value Line

Closed island with small footprint for narrow aisles

Narrow merchandiser

Benefits at a glance

- Narrow depth for small footprint and flexible use
- Available as frozen & chiller island
- Classic reliable island design

Standard configuration

- Insulating front glass with 190 mm (SG2)
- Frameless sliding glass lids with safety glass
- White powder-coated internal fittings
- Superstructure for price rails with two partitions
- Integrated bumpers and single-piece kickplates
- Energy-efficient EC fans
- Bottom-evaporator (F-gas)
- Multiplex kit

Customization

- Horizontal LED lighting for handrail
- Island superstructure for more non tempered display space
- Large selection of wire shelves, wire dividers and price rails
- Bumper for endwall
- Bottom evaporator (CO₂)

The narrow depth of only 1490 mm provides a small footprint and allows use in limited store spaces

AIB SG2-GL+ is available in temperature class M1 and L1 to present normal or low temperature goods

AIB SG2-GL+ comes with glass panels for best product visibility

The EcoDesign regulation

The implementation of the EcoDesign directive for “refrigerated display cabinets with a direct sales function” was adopted by the European Union Commission in October 2019. The application date for the requirements is the 1st of March 2021. The directive applies to newly produced refrigerated cabinets only – the

systems, racks and condensing units are covered by other regulations. The compliance is declared by the manufacturer with the declaration of conformity and with providing technical data to a European database called EPREL and the CE-mark. A verification procedure will be applied by the member states.

All Carrier products presented in this catalogue are EcoDesign compliant.

Energy Labelling

The objective of Energy Labelling is to give clear, easy-to-understand label information on the product energy efficiency, and classify products according to their level of efficiency

(from G to A), with an overall effect of pulling the market towards more energy efficient products. Products marketed prior to March 2021 are not affected.

ENERGY EFFICIENCY CLASS	ENERGY EFFICIENCY INDEX
A	EEI < 10
B	10 ≤ EEI < 20
C	20 ≤ EEI < 35
D	35 ≤ EEI < 50
E	50 ≤ EEI < 65
F	65 ≤ EEI < 80
G	100 > EEI ≥ 80

The Label

Each new refrigerating appliance will be supplied with a printed label gathering energy related information:

Powder Paint Selection Guide

When it comes to customization, Carrier offers a wide range of possibilities in the design of each product – from the front aesthetic to the endwalls and pedestals. These are available in a variety of designs, material finishings and colors. Through the creative use of colors, you can illustrate an inviting and pleasant atmosphere that evokes positive emotions. Shades of reds can express passion, enthusiasm, and energy; whereas blue and green express nature and freshness.

Essential colors

Benefit from a nice design at the best price level

Smart colors

Make the cabinet your style at the best value for money

Exclusive colors

Differentiate your market and customize your cabinet in a wide range of colors. Contact your local sales representative for more information.

Plug-in & remote cabinets in comparison

We can split the refrigerated display cabinets into two types. Remote cabinets have a common central condensing system which supplies several units with the refrigerant. The cabinets have a fixed location and are connected with pipes and wires to the central compressor rack and controller unit. Plug-in cabinets work like a household fridge and have the compressor, condenser and controller unit built into the cabinet itself; they only need a power supply. Both systems come with several advantages and trade-offs.

Plug-in system

Advantages:

- No piping / installation needed
- No machinery room
- Very flexible layout changes

Trade-offs:

- Head rejection in store (bigger air condition needed)
- Less space inside the cabinet
- Regular cleaning of condenser
- Higher energy consumption

Plug-in cabinet with characteristic machine compartment, which includes compressor, drip water evaporation and condenser.

Remote system

Advantages:

- Lower system energy consumption
- Low-noise
- Large usable volume for products
- Wide range of multiplexing options
- Open Cabinet de-humidify store climate

Trade-offs:

- Installation needed
- Fixed installation, not flexible

Remote cabinets connected to the central rack with the gas cooler

Excellence in tests and qualification of cabinets

Outstanding technology based on 60 years development experience

With around twenty testing rooms, Carrier is one of the best-equipped manufacturers in Europe. Most testing rooms are equipped, according to the ISO 23953 standard (refrigerated display cabinets classification, requirement and test conditions), to ensure comparable and good product performance. Besides fulfilling ISO 23953 requirements, Carrier has its own internal tests, standards and requirements that each cabinet has to pass before going to market. This ensures the right quality and is reflected in robust, reliable products to maximize the lifetime of each refrigerated display cabinets.

Measuring temperature performance

Carrier declares the temperature performance of the cabinet, according to the ISO 23953 standard, which defines the refrigerated cabinet requirements and test conditions.

ISO 23953 - Refrigerated display cabinets classification, requirement and test conditions

The refrigerated display cabinets are classified according to the standard ISO 23953. This standard defines the classification, requirement and test conditions for representative refrigerated display cabinets including: the minimum size of the test room, side air-flow, light intensity, temperature and humidification control, calibrated measurements, etc.

Thanks to ISO 23953, customers can compare temperature classification according to the same testing procedure for all manufacturers in Europe who strictly follow the standard.

Climate room requirements and setup

ISO 23953 defines exactly the requirements and tolerances of a climate room including:

- Size of the room
- Side airflow speed and direction relative to the cabinet
- Calibration of the measurement equipment
- Where to place the cabinet in the climate room
- Color of room and light intensity

Example of Carrier testing room. The above picture illustrates how a climate room for testing the refrigeration equipment looks like.

Climate class – describes the environment outside of the cabinet

Of the several climate classes available under the standard, commercial refrigeration usually performs class 3 to measure and declare the temperature performance.

Example: "climate class 3"
Temperature: 25 °C
Rel. humidity: 60 %

Temperature class – describes the temperature performance inside the cabinet

The temperature performance is tested in a cabinet with product-simulation models which are called M-package. The M-package simulates thermal characteristic of meat products.

Cabinet temperature performance means:

- How well the cabinet holds the temperature of a chilled or frozen product – simulation models at lab climate conditions
- How small the cabinet storage temperature deviation of product is – simulation models at lab climate conditions
- Temperature performance is tested by simulating different operation use cases: shop closed (light off, night curtain down, no door opening) shop open and commissioning of cabinet (doors / lids long open) shop open consumer take products (regular door / lid opening)

There are three main temperature class groups: Low, Medium and High temperature. These main groups are split in different temperature classes indicated by a number following the group letter: Example M2. The higher the number the higher the difference between the lowest M-package temperature and highest M-package temperature.

Example: "Temperature Class M2"
(Medium temperature class 2)
Warmest M-package: max. +7°C
Coldest M-package: min. -1 °C

Link between climate class and temperature class

Because the temperature inside a cabinet is strongly influenced by the environment's temperature and humidity, the temperature class is only a meaningful declaration if it is linked to a climate class. For this reason, a full cabinet declaration always consists out of climate class and temperature class.

Example "3M2" (At climate class 3, the cabinet reaches temperature performance M2)
3= climate class (certain ambient test condition during testing)
M2= Temperature class (specified highest and lowest M-package temperature)

Laboratory vs. operation in real store environment

According to the ISO 23953-2 standard Appendix B, there are significantly different operation conditions between lab and store operation, especially for remote cabinets. The following section describes and explains the difference to the application in the field.

Difference between laboratory and store data for remote cabinets

The conditions of a remote cabinet in the store differ very much from the lab conditions. Usually the cabinets in a store are multiplexed, located against a wall and the ambient conditions are lower. Using direct lab data for remote cabinets would lead to an oversizing of piping and compressor racks. Based on this, Carrier provides E6 remote cabinets in the technical data sheets rack sizing data for the standard configuration at store condition 25°C / 60% rel. H. and 22°C / 55% rel. h. This data is available and optimized for each investment and life cycle.

Based on Carrier's leading expertise in refrigerant system design, our general recommendation is:

- Rack design data 25/60 application:
Stores in warm climates, stores with difficult climate situations, cabinet in a non-ideal place (high humidity, high temperature, close to a door etc...)
- Rack design data 22/55 application:
Store in middle and north Europe, stores with moderate climate (with air conditions, multiplexing remote cabinets)

Technical data for plug-in cabinets

To have comparable energy consumption within the Carrier range, we specify the energy consumption for the standard configuration of plug-in cabinets according to ISO 23953 and climate class 3 conditions. This makes the data comparable; however, the real energy consumption in a store is usually lower.

Influence of the cabinet installation on the performance

The installation can have major effects on the energy and temperature performance. There are some requirements, which need to be kept to ensure that the cabinets are working properly.

- Do not install the cabinet outside or next to heating radiators or other heat sources
- Keep a distance from the wall as indicated in the operating manual
- Avoid direct sunlight radiation impact
- Keep free the air intake and outlet area (only plug-in)

Example of a plug-in cabinet which needs free air flow on front and top of cabinet.

Carrier internal testing

To ensure a long life-time and proper operation, Carrier has defined internal standards for robustness and stress tests of cabinets as well as components.

Static robustness test

To test the cabinet and shelf strength, all shelves are loaded with a certain weight for several days. The deflection of brackets and shelves is checked under load and after unloading the cabinet. Only if the cabinet deflection and deformation stays within the small tolerances defined by the Carrier quality department, the cabinet will be released to the market. With high requirements on cabinet stability and strength, Carrier ensures a high-quality product that is safe and stable for years of operation.

Dynamic testing of doors and lids

The door opening test makes it possible to simulate several years of usage that our doors, hinges, and handles are likely to experience within just a few weeks. During the test, the system is continuously monitored and checked in terms of abrasion, break / damage and deformation. The system will only pass the internal qualification if it can resist several simulated years in the tough life of a supermarket.

For double glass doors, Carrier requires additional tests to ensure that the sealing works properly and the doors do not get condensation between the glasses after some years.

Packaging and shipping test

Before each serial launch, Carrier conducts a special packaging and transportation test. This happens with one or several cabinets in a truck going on a defined road with various road conditions. After the transport, the cabinet and the packaging are checked visually. This ensures that the cabinets will arrive to our customers in the same condition as they were packaged in the factory.

CE (Conformité Européenne) certification

The Carrier cabinets are compliant with the relevant standards or parts of the standards as confirmed with the CE declaration of conformity:

- ISO 23953-1 (Refrigerated display cabinets, general)
- ISO 23953-2 (Refrigerated display cabinets, requirement)
- EN 60335-1 (Household and similar electrical appliances. Safety. General requirements)
- EN 60335-2-89 (safety requirement for household and similar electrical appliances, particularly for commercial refrigerating appliances)

To ensure maximum safety, all plug-in cabinets with flammable refrigerant are additionally CE certified by an independent body.

Factory certifications

All Carrier cabinet factories have a certified quality management and environmental management systems

- EN ISO 9001 (General quality management system)
- EN ISO 14001 (Environmental management systems)

Complete & Sustainable Refrigeration Solutions for Food Retailers

Project Planning

- Display cabinets to maximize merchandising opportunities
- Energy and environmental impact consulting and analysis
- Optimal refrigeration technology solutions for each store type
- Complete project design and documentation

Product Development & Manufacturing

- Next-generation display cabinets to help increase sales
- Advanced refrigeration technology and integrated systems
- Energy-efficient solutions for the system lifecycle
- Sustainable natural refrigerant technologies

Lifecycle Care

- Preventative maintenance program
- 24/7 call center and service assistance
- Remote monitoring to ensure optimized performance
- System modernization for improved efficiency

Installation

- Approach tailored to unique customer requirements
- Experienced teams with standard work processes
- A focus on quality throughout the process
- Limited on-site time for minimal business disruption

Carrier Commercial Refrigeration is a leading supplier of high-efficiency turnkey refrigeration systems and services in the food retail industry.
