# Plugs and Cable Retention

Carrier's Container refrigeration systems can be fitted with a variety of electrical plugs to suit your shipboard power supply.

## Plugs

Carrier offers a wide selection of optional electrical plugs for both high- and low-voltage cables.

NT is fitted standard with a 380/460-volt, 50/60-Hz power plug conforming to ISO standard 1496/2 and CEE-17 requirements.

- Optional 380/460-volt MIPCO 333 MPXT plug is available.

Systems fitted with dual-voltage transformers have a second power cable for the 190/230-volt service. Normally, no plug is included with this second cable. Carrier can supply a 230-volt plug as an option.

Available options include:

- MIPCO 534MP2 230V
- MIPCO 634MP2 230V

## Cable Retention

Cable retention devices are available in two types:

- Bungee cord-type elastic strap
- Painted aluminum hinged door with catch

These devices provide secure cable storage and improve system appearance.
