

DRAFT

AN EXCHANGE OF TECHNICAL INFORMATION

**Number:** TL009 - 2024  
**Subject:** Model Lockout

**Released:** September 9, 2024

With software 6320 and later two model numbers were added, 571-113 and 571-123. If either of these model number were loaded, they cannot be changed at a later point. If an attempt is made to load another model number, a "LoAd bAd" message will be displayed.

In an effort to prevent these models from wrongly being entered, the Left screen will cycle between: "rU" and "SurE" and the Right Screen will flash "YES" or "nO", switching between "YES" and "nO" every five seconds. Pressing enter selects the displayed option, with "Yes" accepting the change and "nO" will return to the configuration menu. The display will cycle until the user selects an option or the display times out. When the display times out, no configuration change is entered.

The model number can be referenced on the serial plate of the unit, located on the back wall. Confirm with the customer that the model number on the serial plate is current and update if needed.
