

## Your Smart Device To Greater Functionality

The DR2 (DataReader 2) is a portable handheld serial data communication device with a user-friendly menu. Instructions are initiated through built-in keys, complemented by a 2.4-inch IPS TFT display that remains clearly visible even in bright sunlight.

This device is powered by a single Lithium Polymer battery pack that is designed to run up to 10 days on a single charge. The DR2 can store downloads and operational software files on its internal memory that holds up to 32GB.

The new DR2, a portable handheld device from Carrier, empowers you to seamlessly communicate with reefer controllers even under the harshest conditions. Maintain full control of your reefer units.

Universally compatible for seamless integration with all refrigeration solutions.

- 2.4" Sunlight Readable LCD
- User friendly keypad with status LEDs for charging and operations
- USB-C port for data transfer and power charging
- Large memory space, up to 32GB
- Custom build casing that is durable and non-flammable
- Magnetic mount for easy hands-free use
- Tailored cables for fast, flexible, and secure connectivity

Part Number	Component
07-00619-00	DataReader 2
07-00636-00	Cover, Protective
22-50527-00	Cable, Interrogator Port
22-50528-00	Cable, RMU Port
22-50529-00	Cable, Interrogator MA
22-50539-00	Cable, Telematics
22-50540-00	Cable, Interrogator JST
22-50541-00	Cable, Interrogator CIM6
22-50542-00	Cable, Interrogator MP4000

## Simplify your daily tasks

Retrieve Data

Perform Cold Treatment Calibration

Upload Operational Software

Check Controller Status
