

Turn to the Experts™

DataBank

Carrier Transicold's DataBank patent-pending PC card technology allows you to download DataCorder™ trip data recorder information in less than 30 seconds. Dramatically faster than today's current standard for data downloading, it allows for quick trip data analysis and diagnostics, freeing up your valuable time. So small that it easily fits into a pocket, DataBank PC card technology is operationally cost-effective compared to handheld devices or laptops. It complements many of the existing refrigeration technology solutions available for service technicians and shipping personnel.

Speed

- Download 30 day, 60 day, 90 day, Trip or All data in 30 seconds or less.
- Frees up valuable time and allows for quick diagnostics analysis.

Design

- Compact design provides simple and affordable tool to download DataCorder trip data recorder information.
- It is also convenient, with no special cables or connectors required.
- DataBank PC card technology is so compact it easily fits into a pocket.

Unique Features

- Menu driven system, with easy to read display.
- Executable software application on PC card, which allow for upgrades independent of the controller.
- 100% compatible with DataLINE diagnostic software for system integration.

System Requirements

- Operates in Windows® 95B, 98, NT4.0, 2000 and Windows XP.
- Requires an OMNIDrive™ Pro Universal External PC Card Drive for Parallel Port.
