

Faster service at your fingertips.

## A complete technician's toolbox with the convenience of an app

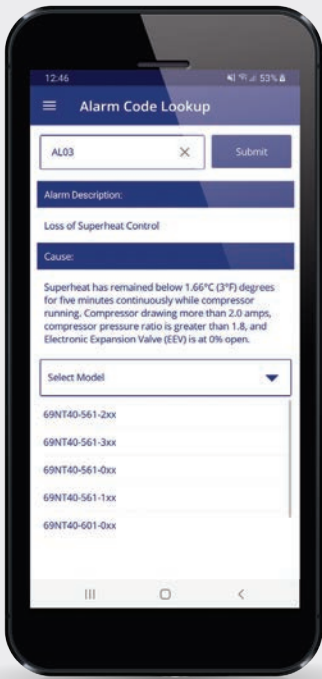

The ContainerLINK™ app for smartphones makes servicing reefer containers simple by providing easy digital access to everyday resources. From electronic manuals for the Carrier Transicold product line to a range of handy service tools, technicians can quickly find what they need to work faster and more efficiently.

### Mobile manuals

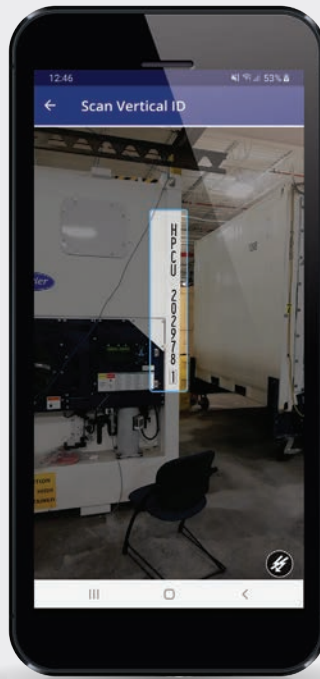

ContainerLINK provides mobile-optimized operation and service manuals for a wide range of Carrier Transicold products:

- NaturaLINE®
- PrimeLINE®
- ThinLINE®
- PowerLINE®
- DataLINE™
- XtendFRESH™

### Alarm code lookup

An alarm code lookup feature gives service technicians the upper hand by providing fast access to descriptions and troubleshooting steps for streamlined maintenance

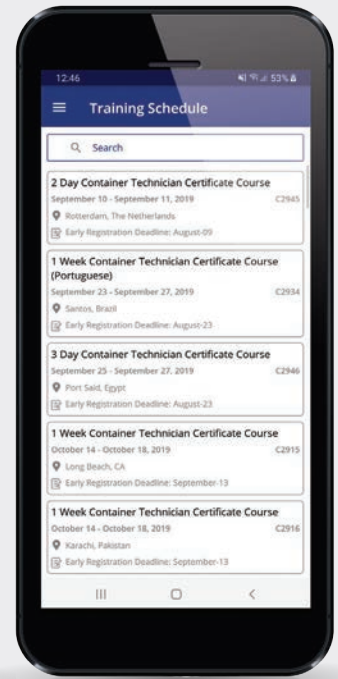

### Optical character recognition

With optical character recognition, ContainerLINK can scan container serial numbers even vertically to check warranty status – taking the hassle out of keying them in manually

### Service center locator

By using the device's location services, ContainerLINK makes it easy to find the nearest service center, including address and contact information

### Training schedule

ContainerLINK lets technicians search through available training courses and register for them with the push of a button

## All the right tools in the palm of your hand

Designed for convenience, ContainerLINK provides one-touch access to the tools technicians need the most when working with Carrier Transicold equipment.

- NaturalINE charge calculator
- Temperature conversion calculator
- Saturation temperature and pressure calculator for a variety of refrigerants:
  - R-134a
  - R-744
  - R-513A

## Smarter tools for faster service

Whether in a service center, a container terminal or on a shipping vessel, technicians can now take advantage of ContainerLINK to improve efficiency and reduce costs wherever Carrier Transicold equipment is in use.

Download the app on **iOS** or **Android**
