**Gain peace of mind and improved
performance with Carrier
best-in-class service and support**

Leading provider of life-cycle services for all your industrial refrigeration needs

- Carrier Commercial Refrigeration's mission is to deliver to all industrial applications and cold storage, innovative and sustainable refrigeration systems focusing on energy-efficient design, optimal refrigerant use and professional after-sales service.
- We are committed to providing best-in-class life-cycle services, which are on the leading edge of technology, innovation and customer satisfaction.
- All Carrier as well as third-party refrigeration systems and including interconnecting services* are cared for: ranging from racks, condensing units, condensers/gas coolers, cold rooms, heat pumps, cooling systems, and controllers. No matter what your equipment, Carrier expert service team is there for you.

Remote Services from BluEdge Command Center

Top-trained Service engineers
COOLacademy

Safety First when working in industrial storage and cold rooms.

Energy savings

Discover our Services

We recognize that the performance of your refrigeration systems can have a big impact on your bottom line. With this in mind, Carrier provides the service and support you need to enjoy optimum performance, naturally – from day one through the entire life-cycle. Service and maintenance programs are tailored to customers' individual requirements to meet the highest quality standards and to ensure maximum uptime of your system.

Tailored-fit service offering

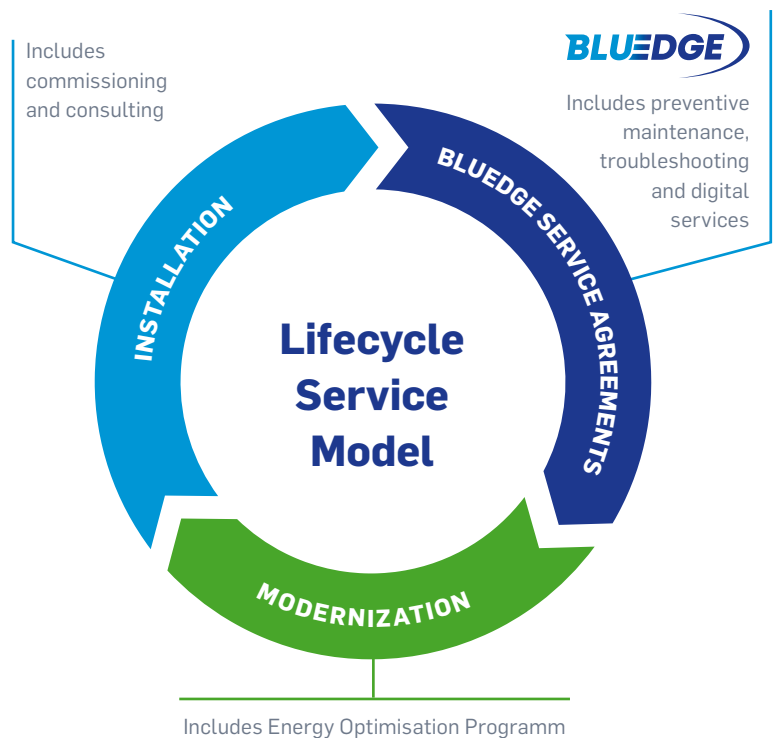

Get BluEdge Service Agreements, tiered packages which are tailored to your refrigeration needs. Or choose from a wide range on-demand services and Add-Ons. We offer you the flexibility you need.

Digital Services for optimized performance

Connect your refrigeration systems to get access to advanced digital services. When it comes to supporting customers remotely, we are there too with our BluEdge Command Center. Here we can support customers in own language, around the clock.

Upgrade your systems for energy cost savings

Carrier offers extensive Energy Optimization Program, aiming to deliver sustainable savings. Such Energy Savings Solutions include modernizations and optimizing the energy performance of the system over its life-cycle.

* Pipework, associated sensors and insulation.
