

CITIMAX280Thin

*Ultra-Thin & Super Cool!
Specialized design for mini van reefers!*

CITIMAX280Thin | Specification

As a new member of CITIMAX, CITIMAX280Thin not only continuous the strong ability and outstanding reliability but also possesses the fresh new condens-
er design. The new ultra-thin and “supercar-style”
design provides CITIMAX280Thin with super cool
appearance, lower air resistance and more flexible
applications!The ultra-thin condenser low the
height of reefer to pass height limited road.

Capacity	2,450W (0°C/30°C) 1,350W (-20°C/30°C)
Air flow	1150 (m³/h)
Weight	40KG
Voltage	12V
Installation	Roof Mount
R404A	800g
Box Volume	1-6m³
Condenser (LxWxH)	1045 × 722 × 130(mm)
Evaporator (LxWxH)	857 × 608 × 170(mm)

► New Design for More Flexible Applications

Less impact of road limitation thanks to ultra-thin condenser design.

Streamlined design provides lower air resistance.

Better water drain, better goods safety thanks to hydrophilic fins and the new skin design of evaporator.

► Control & Accuracy

Box temperature setpoint range: -29°C to 29°C.

Temperature control accuracy: +/- 1°C.

► Proven Reliability

The Citimax range benefits from over 200 million running hours in on-site applications.

Developed by the Carrier Global R&D Center, the Citimax range uses proven refrigeration industry components.

The Carrier Transicold quality process certifies the conformity of all components.

China Headquarter
Add: No.1235 Yecheng Rd., Jiading
District, Shanghai 201821
