

SensiWatch® Platform Mobile App

SensiWatch.Platform
SENSITECH

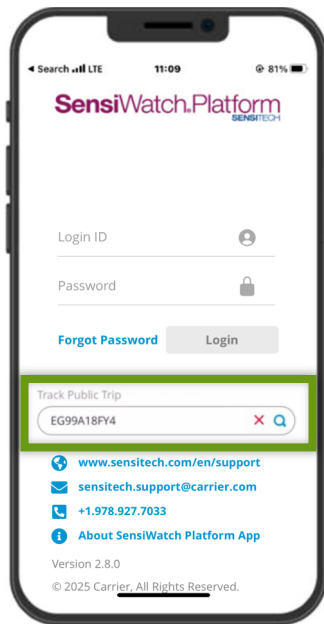

On-Demand Trip Tracking

Available for iOS (13.0 or later) and Android (versions 5.1 and up).
Feature available in app version 2.7+.

This document explains how to use on-demand tracking with the SensiWatch Platform mobile app.

1-Search for Public Trip

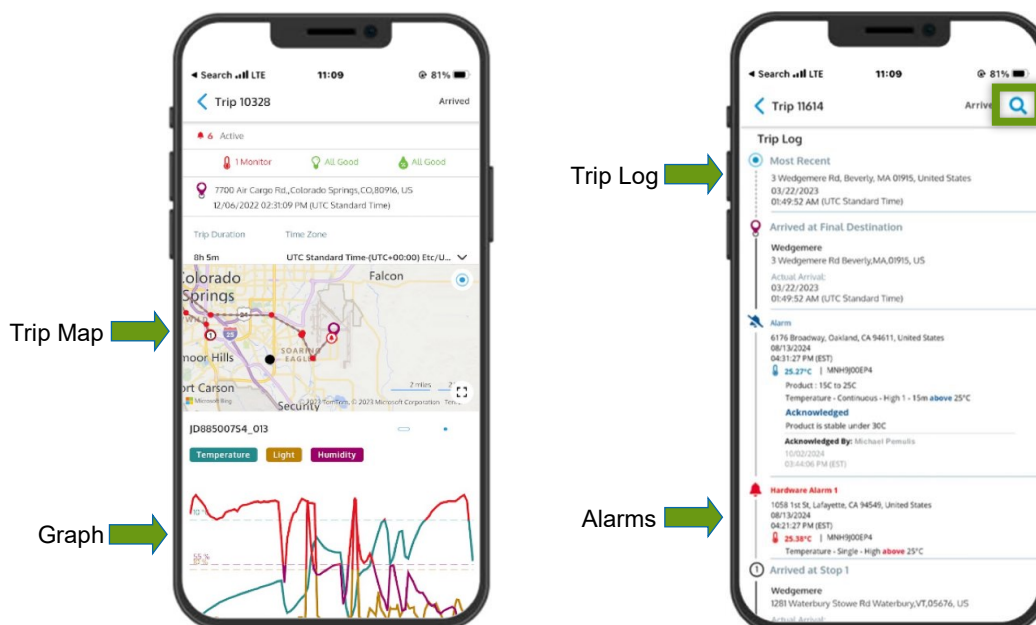

Open the SensiWatch Platform App on your mobile device.

In the **Track Public Trip** field on the login screen, enter the serial number of the monitor used on the trip. No login is required to track an on-demand trip.

Then, tap the **Search icon** to search for public trip details.

2-View Trip Details

The Trip Detail screen displays the monitor **Trip Map**, **Graph**, **Trip Log**, and **Alarms**.

To view additional on-demand trips without exiting to the login screen, tap the Search icon at top right of the Trip Detail screen.

Then, enter the new monitor serial number in the search field.
