

**TRANSICOLD**

## Fuel Optimization Featured in the Vector® HE 19

Reduce your costs and CO<sub>2</sub> emissions while maintaining your cooling capacity with Carrier Transicold's intelligent fuel optimization logic.

# Turn Fuel Efficiency Into Fleet Strategy

The Fuel Optimization feature is an embedded intelligence layer within the Vector HE 19. Inspired by real operating data from Lynx Fleet, it enhances fuel efficiency instantly, without changing a single component.

## Optimized by Real-World Insights from Lynx Fleet

Analyzes operating behaviour

Detects efficiency opportunities

Enhances settings to increase fuel efficiency

Designed to maintain temperature homogeneity

## Upgrade Once. Gain Fuel Savings Instantly.

Available for both single-temperature and multi-temperature Vector HE 19 units.

### Up to 19% Fuel Savings\*

Reduce trailer refrigeration fuel consumption by up to 19%, with no change to daily operations.

### Lower Direct CO<sub>2</sub> Emissions

Up to 19% less CO<sub>2</sub> emissions\*, supporting ESG reporting and LEZ-compliant transport.

### Smart Control, Peace of Mind

Operational traceability and savings insights via Lynx Fleet, without added complexity.

### Lower Total Cost of Ownership

Reduced fuel spend and optimized engine use contribute to a lower total cost of ownership across the fleet.\*\*

### Maintained Cooling Performance

Maintained cooling performance and temperature control, with no mechanical retrofit or hardware changes. Software upgrade only.

### Extended Refrigeration Autonomy

Lower fuel usage enables longer runtime, fewer refuels, and higher productivity.

\* Up to 19% reduction in fuel consumption and corresponding CO<sub>2</sub> emissions, based on controlled comparative testing on Vector HE19 units. Actual results may vary depending on operating conditions, ambient temperature, load, and usage profile.

\*\* Depending on usage patterns and fuel costs.

## Ready to Activate?

Contact your Carrier Transicold sales representative to upgrade your existing Vector HE 19 fleet.
