

TRANSICOLD

XARIOS

Modular range for vans and medium-sized refrigerated vehicles.

PRODUCT SPECIFICATIONS

XARIOS

The XARIOS range is a direct drive refrigeration unit demonstrating unique versatility for vans and trucks. Its design enables transportation of fresh and frozen goods, in single or multi-temperature applications, in vehicles with box volumes from 8 to 48m³ and is available in road only or road and standby versions.

Featuring R404A refrigerant, XARIOS offers a large range of capacities covering temperatures from -20°C to +10°C. Supported by an extensive lineup of ultra-slim evaporators, multi-temperature configurations are widely available for multi-product deliveries.

► Optimised cost of use

Balancing performance and cost of operation, the XARIOS range offers simple and rapid installation, light weight evaporators to optimise load space and enhanced accessibility for reduced maintenance time.

► Driver's comfort

To limit the impact on the community and improve the driver's comfort, the XARIOS range shows low noise levels. Eventually, the cab command is easy to operate and enables an automatic selection of road or road and standby mode. The units' condensers and evaporator skins are fully recyclable.

Xarios 500 / 600 / 600MT

Evaporator Range

MXL 1100

MXL 1550

Accessories

- Road compressor
- Road compressor mounting kit
- Drain water heater for deep frozen application
- Extension connector set for flexible evaporator positioning
- Door switch for doors openings
- voltage reducer 24 Vdc for trucks
