

IntelliSET®

FOR OPTIMIZED REFRIGERATION UNIT CONTROL & OPERATION

SIMPLIFY YOUR OPERATIONS

Carrier Transicold's IntelliSET® option is a flexible micro programming feature designed to simplify unit operation and give you more control over your loads and your transport data.

FLEXIBLE AND EDITABLE

The IntelliSET option makes it possible to run the refrigeration unit using preset operating profiles instead of setting the reefer manually. The preset profiles can change set point, unit modes and much more. There are up to 30 different possible preset profiles and more than 70 editable parameters per profile.

Users

Choose the language and display mode

Data recording

Change the recording interval

Season

Adapt the operating conditions of the unit

Type of customer

Adapt your operation to your client's needs

Application

Whether you operate in low or high ambient, rail, ferry, etc.

Goods transported

Adapt to the goods you are transporting

A plain language display

Up to 30 different IntelliSET profiles (with more than 70 editable settings per profile)

Total flexibility

Flexibility to update or change the 30 available settings at any time

Easy-to-use for the driver

Quick and intuitive access

Enhanced product protection

Minimized errors and optimized settings

Decreased maintenance

Less wear and tear on refrigeration unit

Increased fuel efficiency

Optimized configuration for fuel savings

Easy-to-use for the fleet manager

Fast and easy loading settings

Avoid mistakes

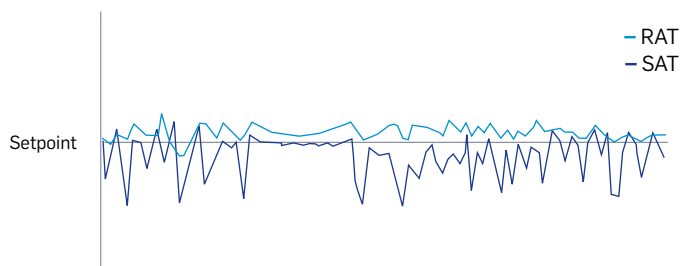

Preventative proofing by avoiding oversights

IntelliSET

CONSTANT AND CORRECT UNIT OPERATION

When using the IntelliSET option with the appropriate configuration, unit operation is correctly configured and set depending on type of goods being transported. Ultimately, this solution allows for load regulation, fuel savings and integrity of the goods as temperature is perfectly regulated.

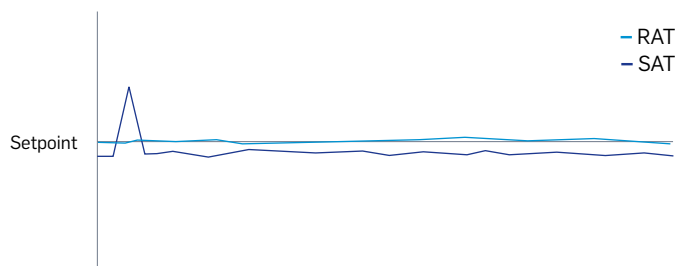

WITHOUT IntelliSET

Overconsumption | Incorrect regulation | Incorrect load control

WITH IntelliSET

10 parameters adjusted

Optimized consumption | Correct regulation | Perfect load control

COMPATIBILITY

Operating conditions can be pre-programmed through TRU-Tech and TRU-View and loaded through a USB device directly on the unit.

IntelliSET is available on:

- **Vector® 1550**
- **Vector® HE 19**
- **Vector® HE 19 MT**
- **Vector® HE 17**

CONNECTED COLD CHAIN SOLUTIONS

Lynx™ Fleet helps Carrier customers optimize cold chain operations, decrease energy use and enhance outcomes with reduced costs, delays, cargo loss and spoilage in transit. By enhancing visibility, resiliency, agility and efficiency in the cold chain, the cloud-connected Lynx digital ecosystem helps reduce loss and supports real-time decisions, ensuring foods and vital medications safely reach people who need them around the world.

DELIVERING CUSTOMER SUPPORT WITH CONFIDENCE

More than 600 service centers

With more than 600 locations throughout Europe, the Middle East, Africa & Russia, Carrier Transicold provides customers with a large refrigerated truck and trailer service network.

More than 2,200 technicians

We place a great focus on technical training and spare parts supply, and we have developed our Performance Assessment and Competitive Excellence (PACE) program to ensure that speed and quality of response go hand-in-hand.

A full-service maintenance agreement

With a BlueEdge maintenance agreement, you can be confident in receiving the optimum level of product support to help keep your fleet operating efficiently and effectively.
