

## The model most preferred and specified for Class K fires in Commercial Kitchens

Badger pioneered the use of wet chemical extinguishing agents and equipment technology for commercial kitchen fire protection four decades ago. Badger's innovative design and approach for a safe and effective way to address the various new Class K code requirements back in 1997 has become the industry standard for kitchen hand portable fire extinguishers.

The 6 liter and 2.5 gallon fire extinguisher models are simple to use and extremely effective in handling the difficult types of cooking media fire hazard situations found in today's busy commercial kitchens.

Badger wet chemical hand portable fire extinguisher models are ideally suited to supplement commercial cooking appliance fire suppression systems for addressing tough Class K combustible kitchen cooking media fires.
