

# RemoteLync Monitor Offers Consumers Simple, Smart Connectivity

Kidde's RemoteLync Monitor offers peace of mind when away from home. It plugs into an outlet and listens for a smoke or CO alarm. When triggered, it sends a message via a free app to the homeowner and other designated contacts. It works with most existing alarms: No extra product or hub to purchase and no monthly fees. One device covers an average-sized home.

## A fire department responds to a home fire every 85 seconds
