# Other Hazards

Calcium carbonate and mica may contain small quantities of quartz (crystalline silica) as an impurity. Prolonged exposure to respirable crystalline silica dust at concentrations exceeding the occupational exposure limits may increase the risk of developing a disabling lung disease known as silicosis. IARC found limited evidence for pulmonary carcinogenicity of crystalline silica in humans.

# **Specific Concentration Limits**

The values listed below represent the percentages of ingredients of unknown toxicity.

Acute oral toxicity < 10%
Acute dermal toxicity < 10%
Acute inhalation toxicity < 10%
Acute aquatic toxicity < 10%

# Description of necessary first-aid measures

# Eyes

Immediately flood the eye with plenty of water for at least 15 minutes, holding the eye open. Obtain medical attention if soreness or redness persists.

## Skin

Wash skin thoroughly with soap and water. Obtain medical attention if irritation persists.

# Ingestion

Dilute by drinking large quantities of water and obtain medical attention.

# Inhalation

Move victim to fresh air. Obtain medical attention immediately for any breathing difficulty.

# Most important symptoms/effects, acute and delayed

Aside from the information found under Description of necessary first aid measures (above) and Indication of immediate medical attention and special treatment needed, no additional symptoms and effects are anticipated.

# Indication of immediate medical attention and special treatment needed Notes to Physicians

Treat symptomatically.

# 5. FIRE - FIGHTING MEASURES

# Suitable Extinguishing Media

This preparation is used as an extinguishing agent and therefore is not a problem when trying to control a fire. Use extinguishing agent appropriate to other materials involved. Keep pressurized containers and surroundings cool with water spray as they may rupture or burst in the heat of a fire.

# Specific hazards arising from the chemical

Pressurized containers may explode in heat of fire.

# **Special Protective Actions for Fire-Fighters**

Wear full protective clothing and self-contained breathing apparatus as appropriate for specific fire conditions.

# 6. ACCIDENTAL RELEASE MEASURES

# Personal precautions, protective equipment and emergency procedures

Wear appropriate protective clothing. Prevent skin and eye contact. Remove leaking container to a safe place. Ventilate the area.

# **Environmental Precautions**

Prevent large quantities of the material from entering drains or watercourses.

# Methods and materials for containment and cleaning up

Sweep up or vacuum and transfer into suitable containers for recovery or disposal.

# 7. HANDLING AND STORAGE

# Precautions for safe handling

Wear appropriate protective clothing. Prevent skin and eye contact.

# Conditions for safe storage

Pressurized containers should be properly stored and secured to prevent falling or being knocked over. Do not drag, slide or roll pressurized containers. Do not drop pressurized containers or permit them to strike against each other. Never apply flame or localized heat directly to any part of the pressurized or plastic container. Store pressurized and plastic containers away from high heat sources. Storage area should be: - cool - dry - well ventilated - under cover - out of direct sunlight

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

# Individual protection measures

# **Respiratory Protection**

Not normally required. Use dust mask where dustiness is prevalent, or TLV is exceeded. In oxygen deficient atmospheres, use a self-contained breathing apparatus, as an air purifying respirator will not provide protection.

Not normally needed when used as a portable fire extinguisher. Use gloves if irritation occurs.

# **Eye/Face Protection**

Chemical goggles or safety glasses with side shields.

# **Body Protection**

Normal work wear.
